

SEMESTER I

Course Title: Accounting For Managers

Course Code: ACCT602

Course Objectives: The purpose of this course is to facilitate an understanding about accounting as an information system and also the language of the business. The course is design in away so as to familiarize the participants with various financial tools and techniques that will facilitate the participants in enhancing their analytical power to make rational decisions related to business.

Course Contents/Syllabus:

Module I : Introduction to Financial Accounting

Nature of Accounting, Branches of Accounting, Types of ownership- Capital Structure , GAAP- Concepts and Conventions, Accounting Cycle, Recording of transactions: journalizing, ledger posting, preparation of Trial Balance.

Module II : Preparation of Financial Statements

Preparation of Companies Financial Statements: as per Revised Schedule III Income Statement Balance Sheet Accounting for Depreciation, Accounting for Dividend and Retained Earnings, Statement of changes in equity.

Module III : Analysis of Financial Statements

Comparative Financial Statement: Trend Analysis, Inter Firm Comparison Common Size ,Ratio Analysis and Cash flow Statement as Per AS-3.

Module VI: Introduction to Cost & Management Accounting

Cost Classification, Preparation of cost sheet. Marginal Costing and Cost Volume Profit Analysis, Valuation of Inventory, Variance Analysis – Material and Labour Budgeting-Fixed & Flexible

Module V Latest Development Trends & Practices

Introduction to financial Software for analysis: Excel and Prowess , Human Resource Accounting ,Inflation Accounting IFRS Framework,.

Text:

- Horngren T Charles 2012, Introduction to Financial Accounting,9th Ed, Pearsons Education

References:

- Narayanaswamy R 2014, Finanacial Accounting – A Managerial Perspective,5th Ed,Prentice Hall of India.
- Maheshwari S N and S K Maheshwari 2013, Accounting for Management,3rd Ed,Vikas Pub. House.

- Tulsian, P.C 2013, Financial Accounting, Tata McGraw Hill.

Course Title: MANAGERIAL ECONOMICS

Course Code: ECON605

Course Objective: To familiarize the students with theoretical concepts of modern Economic Analysis so that they can use these as inputs in managerial decision making process. Emphasis would be laid on the understanding of key economic variables both at micro and macro level which influence the business operations and strategies of the firm and the business environment under which they operate.

Course Contents/Syllabus:

Module I: Theory of demand and supply

Nature and scope of economic analysis: its relevance for a managerial decision making, Demand analysis: nature of demand for a product- individual demand and market demand, demand by market segmentation. Demand function and determinants of demand. Supply function: determinants of supply of a product, law of supply. Elasticity of supply. Concept of elasticity of demand- income, cross, price and advertizing elasticity. Theorems on the price elasticity of demand. Applications of the concept of price elasticity of demand in business decisions. Demand forecasting-- need for forecasting and techniques of forecasting.

Module II: Theory of production and cost

Production analysis: production function-- neo-classical, Cobb- Douglas, Leontief. Least cost combination of inputs for a firm. Concept of an isoquant-- smooth curvature and right angle. Returns to scale and returns to a factor. Expansion path of a firm. Cost Analysis: Costs relevant for management decision making. Economies of scale: Internal and External ,Cost Function: Cost and output relationship. Short Run and Long run. An Analysis of the Objectives of a Business Firm: Profit Maximization Model, Baumoul's Sales Maximization Model, Marris's Model Of 'Managerial Enterprise' Williamson's Model Of 'Managerial Discretion

Module III: Market structure: price and output decisions

Pricing And Output Decisions – Perfectly Competitive And Monopoly Markets Pricing And Output Decisions –Under Monopolistically Competitive Market-- Product Differentiation; Price Discriminating Monopolist; Models Of Oligopolistic Market :Price Rigidity-- The Kinky Demand Curve Model Interdependence-- The Cournot Model, Price Leadership Models, Cartels And Collusion

Module IV: Macro Economic Analysis and Business Environment

Economic Policy and Analysis: Macro Economic Variables and Functional Relationships. Business Environment: An Exogenous Variable. Factors Influencing the Business Environment. National Income Analysis:. National Income Aggregates. Approaches to National Income Measurement. Models of Circular Flow of Money- Incorporating Savings, Investment, Foreign Trade and Government Sector. Models of Income Determination with emphasis on Keynesian

Model. Concept of Investment Multiplier. Factors Influencing Consumption Function- Objective, Subjective And Structural. Demand and Supply of Money: Transaction, Precautionary and Speculative Demand for Money; Liquidity Preference Function; Components of Money Supply. Business Cycles: An Analysis of the Fluctuations in the Level of Economic Activity. Phases of Business Cycles. Inflation and Deflation: Demand - Pull and Cost -Push Inflation. Impact Of Inflation On Employment, Price Level And Other Macro Economic Variables An Analysis Of Policies To Control Inflation. Deflation. Monetary Policy: Objectives of Monetary Policy. Functions of Central Bank. Credit Policy and Its Implications on the Corporate Sector. Fiscal Policy: meaning ,objectives and impact on economy. Money Market ,Capital Market and Foreign Exchange Market

Text Reading:

Course Title: Marketing Management

Course Code: MKTG601

Course Objectives:

The course focuses on formulating and implementing marketing management strategies and policies, a task undertaken in most companies at the strategic business unit level. The marketing management process is important at all levels of the organization. The course will thus provide the students with a systematic framework for understanding marketing management and its 4P's strategy. Accordingly, the course emphasizes the following:

- Primary and changing perspectives on marketing management in the New Economy.
- The impact of interactive media on marketing management.
- Applied marketing management and strategy, domestic and global.
- An international focus in developing marketing management and its strategies

Course Content/Syllabus:

Module I: Marketing for the 21st Century

Marketing for the Millennials. The New Marketing Realities, Difference between Marketing and Selling. The Holistic Marketing Concepts, Relationship marketing, Societal marketing, Integrated Marketing, Ethical Marketing. Delivering and Communicating Value to the Customers. Marketing Mix. Marketing Plan

Module II: Analyzing Consumers & Selecting Markets

The factors influencing consumer behaviour. The buying decision making process. Business Market Vs Consumer Market. Market Segmentations- Basis for Segmenting Consumer and business markets. Evaluating the Market Segments. Targeting the Market Segments. Developing a Positioning Strategy

Module III: Managing Product

Products and Services Defined. Classification of products. New Product development Process, Adoption process. Product mix decisions. Product Line Analysis, Length, width and depth of a line and Brand Management. Product life cycle, stages in lifecycle and factors affecting each stage. Managing product life cycles

Module IV: Identifying Pricing Methods, Marketing channels and Value Networks

Understanding Pricing in Changing Environment. Setting the price, adapting the price. Initiating and responding the price changes. Identifying Pricing Strategies and responding to Competitors. The Role of Marketing Channels. Channels design Decisions. Vertical horizontal and multi-channel marketing systems

Module V: Integrated Marketing Communication

Integrated Marketing Communication. Marketing Communication Process. Promotion mix, Advertising, Personal Selling, Direct Marketing and Social Media. Formulating Marketing Plan and Presentation

Module VI: Latest Development, Trends, and Practices

E-Commerce and M-Commerce Marketing Practices. Triple Bottom Line.

Course Title: STATISTICS FOR MANAGEMENT**Course Code: QAM601****Course Objectives:**

The objective of this course is to give students, a conceptual introduction to the field of Statistics and its applications and to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the business environment. The focus on interpretation rather than computation develops competencies that will aid students in their future careers as managers.

Course Contents/Syllabus:**Module I Introduction**

1. Statistical thinking and analysis ;
2. Statistics defined; Types of statistical methods - Descriptive and inferential statistics; Importance and scope of statistics ;.
3. Scales of measurement;
4. Basic statistical concepts: population and sample.

Tabular and Graphical Descriptive Techniques using MS Excel:

1. Bar chart, Pie Chart, Histogram, Frequency Polygon, Ogive, Pareto Chart.
2. Stem-and-leaf display, Cross tabulations, Scatter plot and Trend line.

Numerical Measures

1. Arithmetic Mean, Median and Mode.
2. Partition Values- Quartiles, and percentiles.
3. Measures of Variability: Range, IQR; Variance, Standard Deviation, Coefficient of variation.
4. Use of MS Excel for Numerical Measures

Module II Probability and Probability Distributions

1. Types of events and Algebra of events. Assigning probability to events;
2. Joint, Marginal and Conditional Probability.
3. Probability Rules; complement Rule, Multiplication Rule, Addition Rule, Bayes' Theorem.

Probability Distributions:

1. Mean or Expected value of random variable.
2. Variance and Standard Deviation of random variables.
3. Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.
4. Using MS Excel for computation of Binomial, Poisson and Normal probabilities.

Module III Sampling, Sampling Distribution and Estimation

1. Sampling: Basic Concepts, Types of Sampling and Non-Sampling Errors and Precautions,
2. Central Limit Theorem,
3. Sampling Distribution of the mean, Sampling distribution of proportion.
4. Estimation: Types Estimates, Using z Statistic for estimating population mean,
5. Confidence interval for estimating population mean when population SD is unknown,
6. Estimating population mean using t Statistic (small sample case), and Confidence interval estimation for population proportion.
7. Using MS Excel for confidence interval construction.

Module IV Hypothesis Testing

Fundamental Concepts of Hypothesis Testing:

1. Developing null and alternate hypothesis,
2. Hypothesis testing procedure, the critical value of the test statistic, regions and rejection and non-rejection,
3. Type I error and Type II error,
4. Level of significance,
5. The confidence coefficient, The power of a test,
6. The p-value approach to hypothesis testing.

Inference about a Population:

1. For single population mean using z-statistic, for single population mean using t-statistic, hypothesis testing for population proportion.

Inference about Comparing Two Populations:

1. Inference about the difference between two population means –
2. Independent samples and Matched Samples,
3. Inference about the difference between two population proportions, Inference about the ratio of two population variances.

Analysis of Variance (Analysis and Interpretation of MS Excel Output only):

1. Testing for equality of k- population means,

Chi-Squared Tests:

1. Chi-squared goodness of fit test for mean, and test of independence. Using MS Excel for Chi-squared test.

Module V Forecasting Techniques

1. Measures of Linear Relationship: covariance, coefficient of correlation.
2. Regression: Model, Estimating the coefficient using least squares method. Assessing the Model (Analysis and Interpretation of Excel Output only);
3. Standard Error of Estimate, Coefficient of determination,

Time Series Analysis:

1. Variation in Time Series, Numerical application of trend analysis only.

Course Title: Professional Communication

Course Code: BC 108

Course Objectives:

This course aims to equip students with effective oral and written communication. Students will learn the difference between oral and written communication, and speaking in multicultural context, conducting and participating in meetings, the correct format of business documents.

Course contents/Syllabus:

Module I: Verbal and Non-verbal communication

Oral Communication: forms, advantages and disadvantages. Written Communication: forms, advantages and disadvantages. Principles and Significance of Non-verbal communication. KOPPACT: Kinesics, Oculistics, Proxemics, Paralinguistics, Artifacts, Chronemics, Tactilics

Module II: Social Communication Essentials

Small Talk. Building rapport. Informal Communication: Grapevine-water cooler-Communication

Module III: Cross cultural Communication

Public speaking in multi-cultural context. Culture and context. Ethnocentrism, Stereotyping, cultural relativism.

Module IV: Meetings

Meetings: Meaning and importance. Purpose of meeting. Steps in conducting meeting. Written documents related to meeting: Notice, agenda, minutes.

Module V: Report writing

Types of reports. Significance of Report. Report planning. Process of Report writing. Visual Aids in Report

Module VI: Employment communication

Cover letter. Resume. Participating in a group discussion. Preparation for Interview. Appearing in Interview

Text and References:

- Krizan, Merrier, Logan and Williams. Effective Business Communication, New Delhi: Cengage, 2011
- Keyton. Joann. Communication and Organizational Culture. Sage Communications

SEMESTER II

Course Title: Financial Management

Course Code: FIBA601

Course Objectives:

- Familiarizing the students with the financial environment of business, especially the financial markets
- Imbibing knowledge about the decisions and decision variables involved in building the liability side of balance sheet of the firm
- Developing the analytical skills by associating the tools and techniques with the situation
- Developing skills for interpretation business information and application of financial theory in financing related decisions

Module I Introduction

A Framework for Financial Decision-Making- Financial Environment, Introduction to Financial Markets and Financial Instruments Changing Role of Finance Managers, Objectives of the firm, Time Value of Money and Risk- Return Analysis

Module II Financing Decision

Leverage Analysis (EBIT-EPS analysis) and Computation of Cost of Capital (WACC & WMCC), Capital Structure Theories- Net Income Approach, Net operating Income Approach, Traditional approach & Modigliani Miller Model, Trade off Models, pecking order theory. Factors determining the optimum capital Structure.

Module III Investing Decisions – Capital Budgeting and Working Capital Management

Capital Budgeting - Estimation of Cash Flows, Criteria for Capital Budgeting Decisions Pay back, ARR, Discounted Payback NPV, IRR, PI, Issues Involved in Capital Budgeting, Risk analysis in Capital Budgeting – An Introduction

Working Capital Management - Factors Influencing Working Capital Policy, Operating Cycle Analysis, Management of Inventory, Management of Receivables, Management of Cash and Marketable Securities, Financing of Working Capital.

Module IV Dividend Decision

Introduction, Factors determining dividend policy, and types of dividend. Theories of Dividend Decisions- MM Hypothesis, Walter Model, Gordon Model. Forms of Dividends- cash dividend, Bonus shares, stock split. Dividend policies in practice.

Module V Valuations Concepts

ROI, Economic Value Added, Market Value Added, Shareholders Value Creation.

Course Title: HUMAN RESOURCE MANAGEMENT

Course Code: HR 612

Course Objectives:

The objective of this course is to encourage students to think critically and evaluate the nature Human Resource Management in order to develop a deeper understanding of implementing the policies to improve the organizational performance. It will provide an opportunity for students to engage in Human Resource related skill development.

Course Contents/Syllabus:

Module I : Introduction to Human Resource Management

HR : Meaning and definition , types and recent trends. HRM: Objectives, scope , functions, trends and practices. Meaning, Concept, Scope of Strategic Human resource management(SHRM). Role and Responsibilities of the Human Resource Manager. HR Policies and Procedures. HRD Strategies in Organizations, Business strategy, HRD and performance.

Module II Human Resource Requirements

Concept and objectives of Human Resource Planning, Need and importance of HR Planning, Stakeholders in HR. Job Analysis – Definition, Process and benefits, Job Design – Definitions, approaches, job description ,Job Specifications. Talent Acquisition: Recruitment, Selection Process, Methods – Interview, GD, Tests. On Boarding talent ,Induction and Placement, Promotion and Transfer

Module III Learning and Development of Human Resources

Learning and Development, Steps of Training Process, Training Need Assessment Program, Training in a changing technological environment. Career Planning and Development, : Career Planning process ,Career Development Strategies of companies. Succession Planning, Talent Management Employee Engagement , Knowledge Management

Module IV Appraising and Managing performance

Personnel Management and Potential Management. Meaning and Objectives of performance appraisal, Different methods of appraisals, Pay linked with performance, Current trends in benchmarking of Performance Appraisals. Managerial Competencies, Competency Mapping

Module V Compensation Management and Incentives

Objectives and Principles of compensation ,Components of compensation, Designing and administration of wage and salary structure, International Compensation Incentives, Financial and Non Financial Incentives,Group and Individual Incentives

Module VI Employee Relations

Concept and Objective of industrial relations ,Role of management in industrial relations. Trade Unions – Their meaning , Need and Function.Workers Participation in Management. Laws related to Industrial Relations. Labour Welfare and Social Security, Employee Health and Safety. Emerging trends in IR

Module VII Future of Work Place :Emerging Trends in HR in the New Millennium

CSR , Green HR. Human Resource Information System (HRIS), HR Audit ,IHRM and emerging issues. Balance of life. HR Analytics , HR and Artificial Intelligence

Course Title: Legal Aspects of Business

Course Code: LAW670

Course Objectives:

This course aims to develop in the student an understanding of the core principles of the laws that regulate business organisations. Course would develop the independent and individual skills needed for students to take their knowledge further, and to apply it in practice in industry, or business environment.

Course Contents/Syllabus:

Module I: Commercial Laws

Indian Contract Act: Definition of contract, Nature and kinds of Contracts, essentials elements and types of a contract, Formation of a contract, performance of contracts, breach of contract and its remedies. Principles Governing Capacity of Parties and Free Consent, Legality of Objects, Performance and Discharge of Contract, Breach of Contract and its Remedies, Quasi contracts, Special contracts of Bailment and Pledge, Indemnity and Guarantee, Contract Of Agency: Nature of agency, Creation and types of agents, Authority and liability of Agent and principal: Rights and duties of principal and agents, termination of agency.

Sale of Goods Act, 1930: Sale and Agreement to Sell, Hire Purchase – Pledge – Mortgage – Hypothecation Lease. Goods – Different types of Goods, Passing of Property in Goods, Conditions and Warranties, Doctrine of Caveat emptor, Rights of an unpaid Seller.

Negotiable Instruments Act, 1882: Meaning of Negotiability and Negotiable Instruments, Nature and requisites of negotiable instruments, Types of negotiable instruments, Cheques Bill of Exchange and Promissory Note –liability of parties, holder in due course, special rules for Cheque and drafts, Crossing of Cheques – Endorsement – Dishonour of Cheques, discharge of negotiable instruments.

Module II Partnership

Indian Partnership Act 1932: Meaning and definitions, Registration of partnerships, Types of partners, Dissolution,

Limited Liability Partnership Act, 2008– Meaning & definitions, Meaning of designated partner, Registration of LLP, Conversion into LLP, Dissolution

Module III Companies Act 2013

Companies Act, 2013-Meaning and types of companies, Formation of a company, Incorporation of companies-Memorandum and Articles of Association, Securities Regulation- Share Capital and Shareholders, Prospectus, Issue of Shares and Raising of Capital, Buy Back of Shares, Debentures, Company Meetings and Proceedings, Powers, Duties, Liabilities of Directors,

Merger and Amalgamation and Winding up of Company, MCA21, Corporate Governance and SEBI-Objectives and Functions

Module IV Consumer Protection Act 1986

Consumer Rights, Procedures for Consumer Grievances Redressal, Types of consumer Redressal Machineries and Forums.

Module V Miscellaneous Themes

Introduction of IPR – Overview of Law & Procedure relating to Copy rights, Trade marks, Patent Act, Infringements.

Information Technology Act 2008- Scope , Applicability and penal provisions

Course Title: Business Research Methods

Course Code: MGMT603

Course Objectives:

- To understand the way in which advanced research can be conducted
- To gain theoretical knowledge and the skill set to address all aspects of creating, managing, processing and converting data to knowledge.
- To develop practical knowledge and skills to understand and carry out research projects as per current Industry 4.0

Course Contents/Syllabus:

Module I : Nature and Scope of Research Methodology

Types of research; Research process and steps in conducting research; Approaches of research: deductive, Inductive, qualitative and quantitative; Planning a research project: Problem identification and formulation. Research Design: Exploratory, Descriptive and Experimental.

Module II: Research Methods and Data Collection Technique

Research modelling: Types, and Stages; Data collection methods: Survey, Observation and Questionnaire ; Questionnaire Design: Steps in constructing a questionnaire, Types of questions, Attitude measurement ; Scaling techniques; Sampling Plan: Sampling frame, sample selection methods, sample size; Sampling and non-sampling errors; Editing, tabulating and validating of data.

Module III Data Analysis Techniques

Descriptive statistics, Review of hypothesis testing procedures: Parametric tests (z-test, t-test, and F-test, Correlation) and Non-parametric test (Chi-square test). Factor Analysis; Data Analysis: Introduction to statistical software SPSS 21.0

Module IV : Inferential Statistics and Prescriptive analytics

Challenges for big data analytics, Machine Learning: Introduction and Concepts, Regression : Ordinary Least Squares, Ridge Regression, Lasso Regression, K Nearest Neighbors Regression, Logistic Regression & Classification Tree ,Clustering, Unsupervised Learning ,Creating data for analytics through designed experiments, Creating data for analytics through Active learning, Creating data for analytics through Reinforcement learning

Module V Field Project and Report Writing

Pre-Writing considerations, Different ways of writing Literature Review, Research report components, Common Problems encountered when preparing the Research Report, Presenting research report.

Course Title: Conflict Resolution & Management

Course Code: BS602

Course Objective:

This course aims at imparting an understanding of:

- To develop an understanding the concept of stress its causes, symptoms and consequences.
- To develop an understanding the consequences of the stress on one's wellness, health, and work performance.
- Enhancing personal effectiveness and performance through effective interpersonal communication
- Enhancing their conflict management and negotiation skills

Course Contents:

Module I: Conflict Management

Meaning and nature of conflicts. Types of Conflict. Styles and Techniques of conflict management. Conflict management and interpersonal communication

Module II: Behavioural & Interpersonal Communication

Importance of Interpersonal Communication. Rapport Building – NLP, Communication mode. Steps to improve interpersonal communication. Meaning and Nature of Behavioural Communication. Relevance of Behavioural Communication

Module III: Relationship Management for Personal and professional Development

Importance of relationships. Maintaining healthy relationships. Communication Styles. Types of Interpersonal Relationships

Module IV: Stress Management

Understanding of Stress & GAS Model. Symptoms of Stress. Individual and Organizational consequences with special focus on health. Healthy and Unhealthy strategies for stress management. Social support for stress management and well being. Stress free, Successful and Happy Life

Module V: Conflict Resolution & Management

Conflict Resolution Strategies. Ways of Managing Conflict (Healthy & Unhealthy). Impact of Conflict Resolution & Management.

Module VI: End-of-Semester Appraisal

Viva - Voce based on personal journal. Assessment of Behavioral change as a result of training. Exit Level Rating by Self and Observer

Suggested Readings:

SEMESTER III

Course Title: Strategic Management

Course Code: STRA701

Course Type: Core Course

Course Objectives:

With growing competition and rapid technological innovations, selection and implementation of a suitable Business Strategy has assumed a vital importance for survival and growth of the business enterprise. This course has been designed to help students understand the concept of strategy and strategic management process.

- The course will equip students to develop a good understanding of evolving business environment and how it influences strategic analysis and strategy formulation.
- It will further enable students to undertake strategic analysis and make the right strategic choice to gain sustained competitive advantage.

Course Contents/Syllabus:

Module I : Introduction to Strategic Management

Introduction to the concepts of Strategy and Strategic Management, Evolution of Strategic Management and overview of Strategic Management Process. Classification and levels of Strategy. Strategic Intent : Concept of Vision and Mission. Business Ethics & Corporate Social Responsibility

Module II: Strategic Analysis

External Environmental Analysis. Industry Analysis using Porter's 5 Forces Model. The VUCA Environment. Environmental Threat and Opportunity Profile (ETOP). Value chain Analysis. Strategic Advantage Profile (SAP). Resource Based View of the Firm-VRIO Framework. Scenario Analysis. SWOT Analysis and TOWS Matrix

Module III: Strategic Choice

Corporate Strategies. Making Strategic Choices using Strickland's Grand Strategy Selection Matrix, Portfolio Analysis using BCG and GE Nine Cell Matrix. Ansoff's Product Market Matrix. Choosing Generic Business Strategies using Porter's Model of competitive advantage. Functional Strategies

Module IV: Industry Structures & Market Strategies

Industry Structures and Lifecycle Stages. Marketing Warfare and Dominance Strategies. Advantages and Disadvantages of Defensive and Offensive strategies. Innovation as Blue Ocean Strategy.

Module V: Strategy Implementation & Control

Resource Allocation and Organization Structure. Integration between various levels of strategy. Measuring performance using Balanced Score Card. Use of Big Data for Balanced Score Card. Problems in measuring performance and establishing strategic controls.

Course Title : Consumer Behavior

Course Code : MKTG 604

Course Objectives:

The purpose of this course is to understand current theoretical and methodological approaches to various underlying aspects of consumer behaviour and consumer research. The course aims at developing the individual's knowledge about underlying psychological processes that drive human consumption. The course also strives to provide awareness regarding theoretical and technological advances in consumer research and psychological science and its application in developing consumer insight.

Course Content/Syllabus:

Module I: Research in Consumer Behaviour

Introduction to Consumer Behaviour (Interdisciplinary Influences). Research Questions, Hypotheses, and Predictions. Conducting Literature Reviews. Choosing a Method in Consumer Behaviour Research Methods: Surveys, Focus Groups, Interviews, Storytelling, Experiments, Observations and Ethnographic Research, Netnography

Module II: Learning, Attitude & Perception

Behavioural Learning Theories & Cognitive Learning Theory. Marketing Applications of Classical Conditioning & Instrumental Conditioning Principles. Encoding, Storage and Retrieval of Information in memory building. Understanding Behavioural Outcomes of Habit Formation and Nostalgia. Shaping Consumers' Attitudes Towards Brands. Brand Attitude Structure: The Consistency Principle; Self-Perception Theory ;Social Judgment Theory; Balance Theory. Attitude Models ; Changing Attitudes. Factors Influencing Consumer Perception. Sensory Thresholds and Sensory Discrimination. Attention: Perceiving Through 5 Sense Organs (Vision ,Hearing , Taste, Smell and Touch). Stimulus Organisation. Interpretation Biases

Module III: Motivation, Personality & Values

Consumer Motivation. Goals and Emotions. Consumer Involvement. Consumer Personality (Freudian Theory ,Neo-Freudian Theories and Trait Theory). Addictive Consumption. Brand Personality. Self-Concept, Desired and Undesired Selves, Gender and the Self. Psychographics. Values and Consumer Behaviour

Module IV: External Influences

Culture and Subculture. Reference Groups- Conformity and Independence, Leadership, Social Power. Social Class Influences on Consumer Behaviour. The Household Lifecycle and Marketing Strategy. Family Decision Making- Roles, Intergenerational Influences, Power and Gender Dynamics

Module V: Consumer Decision Making

Problem Recognition & Information Search. Judgment and Decision Making Based on High & Low Effort. Influence of Retailing Cues on Shopping Perceptions and Behaviour. Post-Decision Dissonance and Regret . Product Disposal

Module VI: New Technologies & Consumer Behaviour

Impact of new Technologies on Consumer Adoption - Smart Devices, Wearable Gadgets. Ecommerce & Mcommerce. Online Social Networks and Brand Communities. The Digital Self. Ownership and the Sharing Economy □ Artificial Intelligence and Consumer Behaviour

Text Reading:

Course Title: Management of Financial Services

Course Code:FIBA721

Course Objectives:

To understand role of Financial Services in Business organizations and to give an insight into the strategic, regulatory, operating and managerial issues concerning select financial services. Examine the present status and Fintech development that are taking place in the financial services sector. Developing an integrated knowledge of the functional areas of financial services & industry in the real world situation.

Course Contents/Syllabus:

Module I : Introduction to Financial Services & Regulations

Financial Services: Meaning, Importance & Role of Financial Services in the Indian Financial System, Merchant & Investment Banking Service- Project Counseling and Appraisal, Procedural aspects of New Issue Management Book Building, Pre-Issue and Post Issue Management of Public Issue, SEBI guidelines for Merchant Banking and Protection of Interests of Investors.

Module II : Non Banking Finance Companies (NBFCs) & Mutual Funds

NBFC: Scope and meaning – importance of NBFC's in Indian economy, Recent RBI guidelines on NBFCs, Chit Funds & Nidhis: Issues and Legal framework. Mutual fund services, MF - concept, need and scope, MF - types of schemes, MF - Recent SEBI guidelines for mutual funds

Module III Leasing, Hire- purchase and Consumer Credit

Leasing and Hire Purchase Services, Types of Leasing, Pricing Methodology, Taxation, and Legal Framework for Leasing and Hire Purchase Companies, Leasing Vs. Buying- NPV, Consumer Credit- factors affecting demand for consumer credit, Terms of finance - fixed and floating ROI, merits & demerits, Bills Discounting,

Module IV Venture Capital and Private Equity Financing Other Financial Services

Characteristics of Venture Capital Financing, Stages of VC financing, Structure & sources of VC financing in India, , difference between angel investors, venture capital & private equity, basis for Investments for VC firms, Exit route for VC, Private Equity and its growth in India. Credit Rating: Concept, Types and Advantages of Credit rating, Credit Rating Agencies and their methodology and rating process, Factoring and Forfeiting Services – Features, Merits and Demerits

Module V: Developments Trends & Practices

Overview of Indian fintech market-Digital Payments, InsurTech, Wealthtech, Managing risk, Emerging technologies disrupting the financial sector

Course Title: PROJECT PLANNING, APPRAISAL AND CONTROL

Course Code: FIBA724

Course Objectives:

The objective of the course is to make the students familiar with financial planning, analysis, selection, and implementation and review the capital expenditure investments. This also aims to acquaint the students with the application of mathematical and statistical tools for analyzing managerial problems in order to select the projects.

Course Contents/Syllabus:

Module I : Planning of Projects

Capital Expenditures, Phases of Capital Budgeting, Levels of Decision Making, Facets of Project Analysis, Strategic Position and Action Evaluation (SPACE), Generation of Ideas, Monitoring the Environment, Corporate Appraisal, Project Rating Index, Formulation of Detailed Project Report

Module II : Technical Analysis

Manufacturing Process, Material Inputs and Utilities, Product Mix, Plant Capacity, Location and Site, Machineries and Equipment, Structures and Civil Work, Environment Aspects, Project Charts and Layouts, Work Schedule

Module III : Financial Analysis

Estimation of Cash Flows, Basic Principles for Measuring Project Cash Flows, Cost of Project, Means of Finance, Cost of Production, Working Capital Requirements and its Financing, Profitability Projections, Projected Balance Sheets, Multi Year Projections

Module IV : Project Risk Appraisal

Types and Measures of Project Risk, Sensitivity Analysis, Scenario Analysis, Break Even Analysis, Simulation Analysis, Decision Tree Analysis, Social Cost Benefit analysis – UNIDO and Little Mireless Approach

Module V: Project Management and Review

Forms of Project Organization, Project Planning, Project Control, Human Aspects of Project Management, Prerequisites for Successful Project Implementation, Time Estimation, PERT Model, CPM Model, Performance Audit. Latest development in project management – Situational analysis, cyber security, Internet of Things.

Course Title: SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

Course Code: FIBA732

Course Objectives:

This course aims at developing an understanding of the changing domestic and global investment scenario in general and Indian capital market in particular with reference to availability of various financial products and operations of stock exchanges. It aims at providing an in-depth knowledge of the theory and practice of portfolio management. Important theories, techniques, regulations and certain advancements in theory of investment will be covered with an aim of helping the participants make sound investment decisions in the context of portfolio investment.

Course Contents/Syllabus:

Module I Nature and Scope of Investment Management and Portfolio Analysis: Overview

Basics of stock markets. Investment versus Speculation, Investment Alternatives and Their Evaluation, Financial Markets, Portfolio Management Process, Approaches to Investment Decision Making, Common Errors in Investment Management, and Qualities of Successful Investing. Role of Portfolio Management, Portfolio Management Practices in International markets.

Module II : Basic Concepts and Methods

Risk and Return –Measuring Historical Return, Measuring Historical Risk, Measuring Expected (Ex Ante) Return and Risk. Fundamental Analysis: Economic Analysis, Industry Analysis , Company Analysis Framework Technical Analysis : Basic Tenets of Technical Analysis – Dow Theory – Behavior of Stock Prices – Major Trends – Charts and Trend Lines – Resistance and support Lines – Different Patterns, Elliot Wave Theory, Efficient market theory.

Module III : Modern Portfolio Theory

Portfolio Theory: The Benefits of Diversification, Diversification and Portfolio Risk, Portfolio Return and Risk, Measurement of Co movements in Security Returns, Calculation of Portfolio Risk, Efficient Frontier, Optimal Portfolio. Capital Asset Pricing Model – Assumptions – Inputs Required for Applying CAPM, The Capital Market Line – Security Market Line, Pricing of Securities with CAPM. FAMA French Model, Limitations for all models.

Module IV : Equity Valuation

Equity Valuation: Balance Sheet Techniques- Book value, Liquidation value, Replacement cost. Discounted Cash Flow Techniques: Dividend discount model, Free cash flow model. Relative Valuation Techniques: Price-earnings ratio, Price-book value ratio, Price-sales ratio.

Module V: Portfolio Management

Specification of Investment Objectives and Constraints, Selection of Asset Mix, Formulation of Portfolio Strategy, Selection of Securities, Portfolio Execution, Portfolio Revision, Performance Evaluation. Latest Developments, Trends and Practice. Structure of Forward and Future Markets. Interpretation of Future and Option Price Quotations.

Course Title: Recruitment, Selection and Retention

Course Code: HR 703

Course Objectives:

This course aims to equip students with knowledge and skill in carrying out recruitment and selection duties in an organization. This course is intended to provide you with an understanding of recruitment and selection methods and processes as well as give you an opportunity to develop a critical approach to R&S. This critical approach is necessary because choosing who to employ is an important way in which employers pursue their interests in the workplace.

Course Contents/Syllabus:

Module I : Human Resource Planning

The planning process: Indicators and trends. Ascertaining demand and supply in human resource. Causes of demand, forecasting techniques and human resource requirements. Staffing models. Linking human resource planning with strategic human resource management.

Module II: Job Analysis

Job analysis and design. Job analysis information and use. Collection of job analysis information. Application of job analysis information. Factors influencing job design methods. Job analysis techniques. Assessing job analysis methods.

Module III : Recruitment of Employees

Recruitment Challenges. Recruitment Sources. Methods of recruitment. Assessing recruitment methods. Legal Compliances in Recruitment and selection

Module IV : Selection of Employees

Influences on recruitment and selection. Pre employment Testing. Background and Reference Checks. The Selection Process. Ethical issues in the selection process. Role of HR analytics in effective R&S.

Module V Retention Strategies for Employees

Retention of Manpower-Models of Retention. Succession Planning. Retention Strategies - Executive education- Flexi timing- Telecommuting Quality of work, Work life balance- Employee empowerment –Employee involvement –Autonomous work teams

Course Title: INTERNATIONAL HUMAN RESOURCE MANAGEMENT

Course Code: HR 711

Course Objectives:

The main objective of this course is to explore the dynamics of global business environment and to prepare the students about examining the maximization of returns in context with human resources. The paper would familiarize the students about the implications of the globalization process, challenges that changes in the international economy and manage the diversity of HRM in an international context and the key HR challenges facing organizations working internationally.

Course Contents/Syllabus:

Module I : Globalization and Human Resource Management:

Introduction to IHRM Definition, Features, elements Approaches to IHRM, Globalization and International HRM. Domestic Vs international HRM Internationalization of firms. Case Study.

Module II : The diffusion of International HRM in MNCs:

Global versus local strategy and structure in MNCs. Transfer of HR practices in MNCs. Knowledge management and international HRM. Cross cultural management. Global work life management. Case Study.

Module III : The management of international HR practices in MNCs:

Talent Acquisition , retention of international managers; Women Expats; Repatriation, International management training and Development. International pay, key components of international compensation, Approaches to international compensation, Global compensation: emerging issues. issue of double taxation, Performance management of international Employees, Rewards and Recognition strategy. Global talent management. Case Study

Module IV : Employee relations:

International perspective of Industrial relations IHRM trends and future challenges. Corporate social responsibility and sustainability in HR Labour regulation in a global economy. Diversity and diversity management. Case Study.

Course Title: COMPENSATION AND REWARD MANAGEMENT

Course Code: HR712

Course Objectives:

The Objective of the course is to equip students with the development and maintenance of internally equitable and externally competitive wage and salary programs. To educate students in compensation with sufficient role of compliance along with discretionary organizational requirements in the matter. In addition to learning contemporary concepts, approaches, techniques and terms, students will be taught the use of technology and measurement in compensation and benefits.

Course Contents / Syllabus:

Module I : Foundation of Compensation Management

Introduction to Pay Model, Defining Compensation, Concept of Wage, Economic Theory of Wages, Strategic Perspectives of Compensation, Internal Alignment, Concept of Equity, Job Evaluation and Methods of Job Evaluation, Hay Guide Chart

Module II : Designing Pay Level

Defining External Competitiveness, Concept of Base Pay, Salary Progression, Contextual Influences on Pay – Allowances: Legal and Unrestricted, Legal Compulsions in Compensation - Labor Laws Applicable to Compensation, Pay Commission, Wage Board and Wage Agreements

Module III: Benefits and Social Security

Defining Benefits, Mandatory Benefits, Benefit Determination Process, Discretionary Benefits, Flexible work schedule, Employee Stock Option Plans, Factors affecting the Benefit Package, Administration of Benefits and Services

Module IV: Pay for Performance

Individual Incentive – Merit Pay, Commission, Team / Group Incentives , Gain sharing and Profit Sharing, Concept of Bonus

Module V: Total Salary Structure and Administration

Analyzing Salary Surveys, Designing a Salary Structure, Ethics in Compensation, Deductions, Severance Pay, Flexi and Customized Compensation, Competency Based Compensation

Module VI: Extending the Structure and Latest Trends

Perspectives on Reward, Person focused Pay, International Pay Systems, Metrics in Compensation, Technology enablers in Compensation, Latest Trends in Compensation and benefits.

Course Title: Strategic Human Resource Management

Course Code:HR709

Course Objectives:

This course is an attempt in the direction of understanding the dimensions related to strategic HRM activities which contributes to an organization competitive edge and examine the irrelevance in the current globalized scenario with special reference to organizations operating in India and abroad.

Course Contents/Syllabus:

Module I The Concept of Strategic Human Resource Management

The Concept of Strategic Human Resource Management (SHRM), Strategic HRM Defined, The evolutionary stages of Strategic HRM, Objectives of SHRM, An Investment Perspective of HRM, Competencies of HR Professional in a SHRM Scenario, Emerging Issues in SHRM,HRM Environment, The Evolving Strategic Role of HR

Module II Models of SHRM

Value proposition through HR, General models-The Best practice approach, Best fit approach and The Universalistic, Contingency and Configurational approaches, The Resource based Strategic HRM, Resource based models-The high performance management, High commitment management and High-involvement management.

Module III Human Capital Management

Human Capital Management Defined, The Concept of Human Capital, Intellectual Capital, Social Capital and Organizational Capital, Human Capital Measurement and Approaches to Measurement

Module IV Strategic HRM in in Action

HR Strategy defined, Purpose, Types of HR Strategies, Formulating HR Strategy, Criteria for an Effective HR Strategy, Strategy formulation propositions, key concept and process issues, Implementing HR Strategy, SHRM: Aligning HR with Corporate Strategy, Integrating the Business strategies and HR Strategies for competitive advantage, Corporate Restructuring and SHRM, Corporate Ethics, Values and SHRM

Module V Impact of SHRM on Business Performance

The strategic impact of Human Resource Practices, Human Resource Evaluation-Definition and Overview, Rationale for HR Evaluation, Measures of HRM Performance, Approaches to HR Evaluations, Evaluating the Effectiveness of SHRM.

Course Title: Measurement in HR

Course Code: HR720

Course Objectives:

Enable students to understand the techniques of identification and measurement of costs and expenses associated with various HR functions. Help students practice the tools and techniques of measuring HR which can be subsequently used to quantify several parameters for effective management of human capital. Enable students to pitch HR as a strategic business partner and develop skills to communicate with and influence key decision-makers within an organization.

Course Contents/Syllabus:

Module I: Introduction and The Challenges of Measurement

Introduction: Meaning & Definition of HR Measurement – Importance; Development of Concept. HR Measurement for HR Professionals; Investment in Human Resources. Efficient use of Human Resource, Adopting the Right Perspective: Understanding the Role of Workforce in Strategy Implementation

Module II: Developing Measurement Metrics

Understanding and Developing The Right Metrics: Tools to Manage The Implementation Of Strategy, Implementing The Metrics. Benchmarking HR, Different Types of Scorecards- Balance Score Card, HR Score Card. Case studies on benchmarking HR

Module III: Principles of Good Measurement. Cost-Benefit Analyses for HR Interventions

Measuring HR Alignment. Measuring Hiring and Staffing, Measuring the Value of Compensation and Benefits. Measurement of Training and Development. Case study on calculation of ROI

Module IV: Specific Topics in Measurement

Measuring the Value of Employee Relations and Retention Program, Models for Assessing Return on Investment, Assessing Value of Outsourcing and Call Centers. Case study on outsourcing of HR

Module V: TQM and HRIS

Role of TQM in HR Measurement. HR Audit, Implementing HR Audit, Methodology and Issues, HRD Scorecard, HRD Audit – The Indian Experiences and Cases, People Capability Maturity Model (PCMM), Measuring Intellectual Capital and Web Based HR Systems Human Resource Information System

Role of Information System in Human Resource Decision Making, Designing and Implementation of HRIS, Organizing Data, Personnel Audit and Personnel Research, Computer Applications in HRM Functions (uses and trends). Case study on HR Audit and Accounting.

Course Title: I.T. PROJECT MANAGEMENT

Course Code: CSIT705

Course Objectives:

IT Project management is an area of project management that has an emphasis on computer technology. Often projects failure due to the approach towards its implementation. Software project management consists of the various methodologies and tools that assist in the successful completion and implementation of an Software project. This course covers the nitty-gritties of project management where students will learn what project management involves and how to approach it successfully.

Course Contents/Syllabus:

Module I

Introduction to Project, Project Management and IT Project Management. Project dimensions, Portfolio Management, Program Management, and Relationship between Project, Program and Portfolio Management. Project vs. Operations Management, PMO Functions, Enterprise environmental factors. Role of Project Manager and Competences of Software Project Manager, Stakeholders, Project Roles, Role of Organisations Culture, Style and Structure on Project Management, Product and Project Life cycle. Process Overview, Project Management Process Interaction, Introduction to PMI Process Groups and Knowledge Areas, Project and Product Life cycles. Software Development Product Life Cycle Processes and Activities, SDLC selection criteria.

Module II

Project Charter, Develop Project Management Plan, Direct and Manage Project Execution, Monitor and Control project work, Perform Integrated Project control, Close project or phase.

Define goal and scope, Verify scope, Control Scope, Flexibility Matrix, Creating Project Charter, SPMP, Approaches to create WBS. Define Activities, Sequence Activities, Dependencies consideration, Estimate Activity Resources, Estimate Activity Duration, and Activities for various Life Cycle Models.

Module III

Different Size Measures, process of Estimating the Size of a software, Reuse Estimation, LOC, Function points. Scheduling fundamentals, Gantt Charts Control Schedule, PERT, CPM Scheduling Levelling Resource Assignment, Crashing and Fast Tracking. Implementation on MS Project 2010.

Module IV

Project Cost Management, Effort Measures, Types of Cost Estimates Model, Cost Estimation Tools and Techniques, COCOMO Cost Estimation Model, Problems with Cost Estimation, Cost Budgeting, Preparing Cost Baseline. Project Progress Management Earned Value Management and Earned Value Tracking.

Module V

Risk Management Introduction, Risk Management Models, Risk Identification, Analysing and Quantifying Risks. Monitoring and Controlling Risks, Risk Categories, Sensitivity Analysis, Risk response Planning Developing Risk Management Plan. Quality planning, Quality Assurance, Quality Control, Total Cost of Quality, Building SQAP. Keys to Managing People, HRP, Acquiring, developing and managing the Project Team, Resource Assignment, Loading and Levelling. Communication Planning, Information Distribution, Performance Reporting, Managing Stakeholders. Planning purchase and acquisition, Planning Contracting, Administering the Contract and Closing the Contract. Identification of objects in s/w conf., version control, change control, configuration audit, status reporting. Handling challenges of Large Projects.

Course Title: Business Intelligence & Data Analytics

Course Code: CSIT709

Course Objectives:

Data mining is the discovery of hidden information from historical data. With data mining, it is possible to better manage product warranties, predict purchases of retail stock, unearth fraud, determine credit risk, and define new products and services. This course introduces basic data mining technologies and their use for business intelligence.

Course Contents/Syllabus:

Module I : An Overview of Business Intelligence, Analytics and Decision Support

A Framework for Business Intelligence (BI). Intelligence Creation Use and BI Governance. Transaction Processing Versus Analytic Processing. Successful BI Implementation. Analytics Overview. Brief introduction to Big Data Analytics.

Module II Data Warehousing

Data Warehousing Process Overview. Data Warehousing Architectures. Data Integration and the Extraction, Transformation, and Load Processes. Data Warehouse Development. Data Warehousing Implementation Issues. Real-Time Data Warehousing. Data Warehouse Administration, Security Issues and Future Trends

Module III Business Reporting, Visual Analytics and Business Performance Management

Business Reporting Definitions and Concepts. Data and Information Visualization. Different Types of Charts and Graphs. The Emergence of Data Visualization and Visual Analytics.

Performance Dashboards. Business Performance Management. Performance Measurement. Balanced Scorecards. Six Sigma as a Performance Measurement System

Module IV: Data Mining

Data Mining Concepts and Applications. Data Mining Applications. Data Mining Process. Data Mining Methods. Data Mining Software Tools. Data Mining Myths and Blunders.

Module V: Text and Web Analytics

Text Analytics and Text Mining Overview. Natural Language Processing. Text Mining Applications. Text Mining Process. Sentiment Analysis. Web Mining Overview. Search Engines. Web Usage Mining (Web Analytics). Social Analytics

Module VI Big Data and Analytics

Definition of Big Data. Fundamentals of Big Data Analytics. Big Data Technologies. Data Scientist. Big Data and Data Warehousing. Big Data Vendors. Big Data and Stream Analytics. Applications of Stream Analytics

Module VII Analytics: Emerging Trends and Future Impacts

Location-Based Analytics for Organizations. Analytics for Consumers. Recommendation Engines. The Web 2.0 Revolution and Online Social Networking. Cloud Computing and BI. Impacts of Analytics in Organizations: An Overview. Issues of Legality, Privacy, and Ethics. The Analytics Ecosystem

Course Title: E-Business and Trade

Course Code: CSIT723

Course Objectives:

To acquaint the students with basic principles e-commerce and to develop a broad understanding of e-business and its dimensions, including driving forces and impact on business, individuals, culture, and global economics. Also, to know the various aspects of e-commerce transactions.

Course Contents/Syllabus:

Module I: Foundation of Digital-commerce

Digital Commerce Foundation. Definitions Advantages and Limitations of EC. The Driving Forces behind EC. Impact of Digitization on business operations. Launching a Business on the Internet. Digital Challenges of a traditional management strategy

Module II: Digital Business Models

E-business: Characteristics. What is a business model. Digital as a business model. Digital business models in practice. Asymmetric business models – creating unfair advantage

Module III: B2B Marketing

What is B2B Marketing. Push & Pull and the 4W's Approach. B2B: Product Marketing. B2B: Price Marketing. B2B: Promotion Marketing. B2B: Place Marketing

Module IV: E -Security & Electronic Payment Systems

Electronic Payment Media. Payment System Models. Cyber Banking. Risks in Cyberspace. Protection and Recovery. Encryption

Module V: Emerging Trends in Digital Business

New trends & technologies (cloud computing, mobile and tablet apps, etc.). Embedding new technology in organisations. Developing competitive advantages through technology. Communities of practice, diverse venture teams and socio-technical systems needed to create successful digital models. The creation and development of a digital transformation plan

Course Title: SYSTEM ANALYSIS & DESIGN

Course Code: CSIT729

Course Objectives:

The objective of this course is to provide adequate understanding of systems concept, system analysis, and systems design, which would help them in having efficient and workable information system for management. To provide an understanding the role of Hardware and Software for realizing organizational Objectives and automation. To provide an understanding of the role of systems analyst and software development firms for their role in distributing meaningful ERP modules and other business intelligent system. To provide an understanding of the role of system analysis and design within various systems development stages. To develop an awareness of the different approaches that might be taken to systems design. To understand the activities of the management and systems analyst, and in the overall development of system. To develop an understanding of Testing software and complying the various software quality parameters. To develop an understanding of how to migrate old data within newly developed system with the help of various techniques.

Course Contents/Syllabus:

Module I – Understanding System Concepts and Use within Industry

Importance and Meaning of System, Role of system / Information system in creating effective organization, Role of system / information system in value generation within organizational level/structure Role of automation system in business process and integrated business modules- manufacturing and service industry Traditional verses Online based ERP system Types of Systems and its element.

Module II – Understanding System Analysis and Design

Understanding the meaning of System Analysis and Design Figure out various reasons for Conducting system analysis Role of Management in conducting system analysis to cater competition and incorporating latest technology within the process Role of Software development firms-SAP, ORACLE, BAAN, PEOPLESOFT, MICROSOFT and GOOGLE in providing ERP and Business Intelligent Software/System. Role of System Analyst and its function Attributes of System Analyst

Module III – Requirement Determination and Development Life Cycle

Understanding the needs for developing/upgrading system Defining the type of system- Integrated, stand alone, Automated and Online based System Methods / tools used for collecting and recording facts and requirements from users Various system development tools- Computer Aided Software Engineering (CASE), Joint Application Development (JAD) and Rapid Application Development (RAD) Introduction of System Development Life Cycle (SDLC) and Agile

Module IV Feasibility Study and Negotiation

Understanding / Importance of Feasibility Study/ Analysis Various Consideration while conducting Feasibility Study Steps of Conducting Feasibility Study Understanding feasibility Aspects: - Economical, Technological and Behavioral Understanding the system performance aspects- Data Center, Traditional HDD verses SSD, RAID, Integration of hardware and Software and Mainframe by giving examples of YouTube, Flipkart and Google Services Preparing Feasibility report and presenting final draft for system proposal Negotiation strategy

Module V- System Analysis, Design and Testing

Understanding the structured Tools- System Flow Chart, Data Flow Diagram, Data Dictionary, Decision Table, Decision Tree, and structured English for defining system specification with examples. Designing candidate system using structured tools Steps in Designing system Designing of –output system, input system, process, file design/Data base and interfaces Understanding the role of testing and its types Understanding the various software quality assurance

Module VI – System Implementation/ Maintenance and Review

Understanding the importance of Implementation within organization Training to the Users on candidate system Conversion Strategy / integrating old system into new system Choosing the best implementation strategy Maintenance plan/ AMC Review of organizational effectiveness Understanding the various reasons for success and failure of ERP system within organization

Course Title: Web based Business Process

Course Code: CSIT717

Course Objectives:

To acquaint the students with basic principles of the principles of the Internet and the World Wide Web, to develop a broad understanding of digital customers;

Course Contents/Syllabus:

Module I : Web enabled Business fundamentals

Internet Basics: Internet, Intranet, Extranet, Portals, Web and Wireless, e-Business & e-Marketing. Markets (including B2C, B2B and C2C), the web media landscape - key trends emerging trends, the impact of web on businesses. How significant is web in doing businesses?

Module II: Virtual Value Chain

The Virtual Value Chain: Marketplace vs. Market space - Visibility, Mirroring Capability and New Customer Relationships - The Network Economy - "Moore's Law" and "Gilder's Law" - E-Marketplaces and Economic Impacts, Consumer Behavior on the Internet: Demographic, geographic, psychographic and behavioral factors.

The Web Marketing Mix: Continuum of purely virtual to purely physical products- Product in the Internet Marketing Mix - presenting product online, building a brand – Price in the Internet Marketing Mix - Importance of price competitiveness to e-Business - Place in the Internet Marketing Mix : the importance of fulfillment, logistical considerations- Promotion in the Internet Marketing Mix - reaching the e-consumer

Module III: Understanding Online Customer

Understanding customer on the Internet: Motivations for shopping on the net – attributes of online shopping, Sources of data collection on the web, (HitWise, comScore demos), Using surveys, Observational research - click-tracking, heat-mapping ,Third-party data sources, Site centric systems. Principles of website design: customer experience and usability: Alternative approaches to website design, Usability and accessibility, researching your site visitors

Module IV : Planning and managing website development:

The role of the website, Planning and briefing web projects - internal stakeholders and selecting / briefing external partners , The project plan - key elements to be included, Web technologies - CMS, XHTML, CSS, mash-ups, XML feeds, AJAX etc., video streaming and rich media, Information architecture - planning customer journeys. Principles of effective website design: content, page layout, style sheets and navigational tools, Copywriting for the web. Wireframes - testing and implementing website designs, Budgeting for web projects

Module V: Customer Experience on the web

Customer Experiences on the Web: The web's 'unique capabilities' – Interactive communications with customers for - organizational learning, service capability, convenience. Application of web in different businesses: Marketing, Accounting, Human Resource, Advertising, Operations. Regulation, permission and codes of practice: An overview of today's online legal environment - key legislation affecting web businesses, Intellectual Property Rights - how to protect your assets online, Data Protection - everything you need to know about protecting customer data, Digital signatures, Global trading perspectives, Domain names and registered trademarks (TM) online, Social media and the law - what are the implications of Wikis, blogs, peer-2-peer communities etc, Web analytics - what are the options and their respective benefits? Module I : Web enabled Business fundamentals 10%. Internet Basics: Internet, Intranet, Extranet, Portals, Web and Wireless, e-Business & e-Marketing. Markets (including B2C, B2B and C2C), the web media landscape - key trends emerging trends, the impact of web on businesses. How significant is web in doing businesses?

Course Title: INTERNATIONAL CURRENCY MANAGEMENT

Course Code: IB707

Course Objectives:

Each entity engaged in international business activity needs foreign currency. The course aims to introduce students to the basics of currency risk, trading and its management in international business transactions/operations. The course will involve understanding the need for international currencies, types of associated risks, an idea of the trading mechanics in Indian & International Currency Markets, linkages to Money Markets, Interest rates, Economic and World events. The course will also teach how to manage currency risk and impart knowledge of the Mitigation Tools (Forwards/Futures/Options/Swaps) and strategies (Hedging/Speculation/Arbitrage) which traders or businesses can adopt.

Course Contents/Syllabus:

Module I: Importance of International Currency Management in Global Business

Importance of foreign currencies in International Trade & Business. Volume, Participants, Risk from Currency Volatility and experiences of MNC's in cross border transactions. Role of market-makers.

Module II: Introduction to International Currency Markets & Terminologies

Spot and Forward Markets, Trading Terminologies & Mechanism, Currency Convertibility, Major/Minor currencies. ISO Currency codes, linkages to other Global Markets & Events, Interest Rates, benchmarks LIBOR/MIBOR. RBI compliance for Remittance.

Module III: Calculation of Currency Rates

Exchange Rate Determination – Bid/Ask, Margins, spread. Cross-currency calculations – Practice exercise on the arithmetic of various currencies. Interest Rate & Purchasing Power Parity, Negotiating rates for inflow/outflow for different international transactions.

Module IV: Currency Risk/Exposure & Trading Strategies

Transaction, Translation and Operating Exposure. Trading Strategies for Hedging, Speculation & Arbitrage.

Module V: Currency Risk Mitigation & Management Tools

Concept of Hedging. Hedging strategies of Corporates. Currency Risk Management using Currency Derivatives like Forwards, Futures, Options & Swaps.

Course Title: WTO AND INTERNATIONAL REGULATORY ENVIRONMENT

Course Code: IB708

Course Objectives:

The primary objective of this course is to focus on the role of International Trade Institutions in promoting international Trade. The course also focuses on rapidly expanding legal system of the World Trade Organization (WTO) and also to provide a basic insight into the institutional and substantive law of the WTO.

Course Contents/Syllabus:

Module I: Role of International Institutions in International Trade

World Bank, IMF, WTO, UNCTAD, International Trade Centre (ITC), Geneva, USTR (United State Trade Representative), CBI (Centre for Promotion of Imports from Developing Countries)

Module II Origin of WTO

Evolution of GATT, From GATT to WTO, Multilateral and Plurilateral Agreements, Principles of GATT, Exceptions to WTO Commitment

Module III Regulatory Frame work of WTO

Sanitary and Phytosanitary Measures, Technical Barriers to Trade, Safeguards, Rules of Origin, Agreement on Agriculture, Agreement on Textile and Clothing, Subsidies and Countervailing Measures, Trade Related Intellectual Property Rights (TRIPS), Trade Related Investment Measures (TRIMS)

Module IV General Agreements on Trade and Services

Objective and Need for GATS. Services covered under GATS, Obligations, Commitment and Schedules under GATS, Special and Differential Treatment under GATS

Module V Dispute Settlement Mechanism

Stages in Dispute Settlement Mechanism, Procedure for Appeal, Implementing Recommendations of DSB

Course Title: GLOBAL COMMODITY TRADE

Course Code: IB709

Course Objectives:

Commodities like cereals, crude oil, coffee, sugar, gold, rubber, cotton etc dominate global trade. The course imparts knowledge of which countries dominate world production/ export/ import of various commodities, familiarity with the function and mechanism of Indian and International Commodity Exchanges, identification of commodity risks faced by suppliers & consumers of commodities and suitable strategies to mitigate commodity market risk.

Course Contents/Syllabus:

Module I: Introduction to Commodities & Top Commodity Producing & Trading Countries

Changing Int'l Trade scenario & in 21st Century, Commodities – Definition, Features, Types, History, Participants, Structure & systems of commodity trade, Top Exporter & Importer countries of World's most traded Agri commodities, Crude oil, Gold, Silver etc, India's place in World Commodities

Module II: World's Commodity Exchanges

World's Major Commodity Exchanges - USA, Canada, Latin America, Europe, China, Asia, Africa & Oceanic □ History, Shareholding pattern, Products & Contract specifications of Commodities traded on world's top Commodity Exchanges

Module III: Indian Commodity Exchanges

Turnover, Evolution, Forward Market Commission, Contracts Act, Regional & National Commodity Exchanges, Structure, Shareholding, Turnover, Products Traded on National Exchanges MCX, NCDEX, NMCE, ICEX, ACE, UCX, Case study on National Spot Exchange Ltd (NSEL)

Module IV: Commodity Derivatives

Derivatives - Definition, Types, OTC vs Exchange Traded, Participants, Evolution, Economic Functions & benefits, Risks, Commodity Futures & Options - Characteristics, Terminologies, Margins, Physical Delivery, Assignment, Warehousing, Quality specifications, Membership, Charges, Trading, Clearing & Settlement, Strategies for Hedging, Speculation & Arbitrage, Types of Orders, Difference between & Options & Futures, Right/Obligation of Buyer/Seller, Call/Put Options

Module V: World's Most Traded Commodities

Presentations on Cotton, Edible oils (Rapeseed, Soy, Palm Oil), Tea, Coffee, Sugar, Wheat, Crude Oil, Steel, Rice, Pulses, Rubber, Gold, Silver, Copper etc - World Trade, India's share, Production, Global demand & supply, Consumption & price patterns, Quality, Trading, Contract specifications, substitutes etc.

Course Title: International Business Negotiation

Course Code: IB713

Course Objectives:

The central aspect of international business involves negotiation: the establishment of the terms under which a business transaction will take place. Negotiation involves techniques, procedural steps, tactics and strategy. You must have an understanding of the role of authority, power and influence in negotiation. International negotiation involves a further factor—the role of culture. Culture has an impact on how negotiations are conducted and what behaviors are and are not acceptable and effective.

Course Contents/Syllabus:

Module I International Negotiation in Theory and Practice

Theory, processes, and practices of negotiation. The Nature of Negotiation. Negotiation framework. Negotiation strategies & tactics, Strategy: Distributive Bargaining and Integrative Negotiation. Who Negotiates? New Players in the Old Game. Obstacles to Negotiation and Negotiation Phases: Pre-negotiation and problem-solving, bargaining and post-agreement negotiations

Module II The Process of Negotiation:

Negotiation analysis and planning. Negotiating in groups. Negotiation sub-processes, Perception, Cognition and Emotion, Drivers of Negotiation Process. Communication, Finding and using negotiation Power. Influence: Routes to Influence, Role of Receivers in Influence, Ethics in Negotiation

Module III Multi-Issue Negotiations & Multiparty Negotiations :

Relationships in Negotiation. Key Elements in Managing Negotiations within Relationships. Parties in Negotiation: Coalitions, The nature of Multi-party negotiation. Negotiation in the Age

of Information and Technology. Third-Party Mediation and Negotiation : Types and Roles- The Role of Violence : Negotiation in the Midst of Violence

Module IV International Negotiation Environment & Culture

International negotiation environment & international negotiator behavior, Negotiation with : Japanese. Chinese. Europeans. Americans. Indians, Managing negotiation complexity, International negotiation best practice

Module V Endgame: Closure and Planning for Implementation

Planning for Implementation. Art of Closing. Changes and challenges ahead. Strategies to cope with changes and challenges

Course Title: INTERNATIONAL BUSINESS AND PRACTICE

Course Code: IB602

Course Objectives:

This course provides a comprehensive overview of the role that international business plays in the global economy. This knowledge shall help to understand the complexities, risks and opportunities of international business and provide a global perspective on international trade, including foreign investments, impact of financial markets, international marketing, and the operation of MNC's. Students would get to know business practices organizations adopt to tap global opportunities. It will also create awareness on career opportunities that exist in international business and MNC's.

Course Contents/Syllabus:

Module I: Globalization & Multinational Corporations

Int'l Business in 21st century; World's Top Economies. Globalization - Meaning and implications; Drivers of Globalization; The globalization debate - arguments for and against. Multinational Corporations- Definition, Types, Organization, Design & Structures, Head quarters and Subsidiary relations ; EPRG Model

Module II : Introduction to International Marketing

Differences between domestic and international business; Different Modes of entry into international markets – Factors & Types – a) Export & b) Production Abroad. Export – Indirect and Direct Export. Production Abroad - Assembly/Contract Mfg, Licensing, Franchising, Joint Ventures, Mergers & Acquisition, Wholly owned subsidiary.

Module III: Introduction to International Trade

Theories- Theory of Mercantilism, Absolute advantage, Comparative Advantage, Hecksher-Ohlin theory, The New product life cycle theory, The New Trade theory, Porter's Diamond Model ; Tariff & Non-tariff barriers. GATT, WTO, TRIPS, TRIMS, GATS, Ministerial Conferences, WTO round of negotiations.

Module IV: International Business Environment

External Environment - STEEPLE / PESTLE Analysis. Implication of environment differences due to Economic, Social, Political, Legal, Cultural variations. Hofstede Model

Module V: Introduction to International Financial System

International Financial Markets – Equity, Debt, Foreign Exchange & Commodities. Role of Banks in Global Financial Transactions – NOSTRO, VOSTRO, SWIFT. Modes of Payment in International Trade – Advance, Open Account, Documents on Collection, L/C, Consignment-basis. FDI's & FII's.

Course Title: Supply Chain Management

Course Code: POM702

Course Objectives:

This course aims to develop an understanding of the supply chain management practices and their interrelationships with other organizational functions. This course provides students the necessary analytical tools and prepares them for managing the supply chain operations. Students completing this course will have basic knowledge of procurement, logistics, vendor management and supply chain management. The course also provides exposure to the latest developments, trends and practices in this field. Industry experts would be invited to present the practical issues in managing the function.

Syllabus:

Module I: SCM concepts. Sourcing Process and Managerial Issues.

Understanding the Supply Chain, Understanding logistics. Evolution of Logistics and Supply Chain Management in the Overall Organization's Functioning, Objectives of a Supply Chain. Process views of a Supply Chain. Value Chain of a Company. SCM drivers and Metrics.

Purchase Management, Sourcing Process, Strategic Sourcing, Total Cost of Ownership, Global Sourcing, INCO Terms, E-Procurement/E-Commerce. Vendor Management and Development.

Module II: Logistics Management

Logistics defined, Scope of logistics; Value added logistics services. Logistics at the centre of World Trade. Global logistics operation and its document handling. Types of shipment. Containerization in SCM, Role of logistics in Distribution channel. Multi-modal transportation.

Logistics outsourcing:3PL and 4PL logistics. Reverse Logistics and Closed-Loop Supply Chain.

Module III: Managing the Supply Chain Performance .

Warehousing operations, Inventory Management, Supply Chain Cycle Inventory ,Safety Inventory, Vendor Managed Inventory, SCM and Information Technology, Application of RFID, ERP, JIT, Optimization of Supply Chain, Retailing Management, Waste Elimination and Lean Thinking in Supply Chain; Supply chain performance measurement systems; Supply Chain Balanced Score Card, SCOR Model..

Module IV: Latest Development, Trends and Practices

Application of Block chain, Artificial Intelligence and Internet Of Things in SCM, Risk Management in Supply chains, Governance issues and role of Ethics, Sustainability and the Supply Chain. Best Practices in SCM.

Course Title: Capacity Planning and Management

Course Code: POM 704

Course Objectives:

The objective is to familiarize the students with the aspects of planning and control of capacity in an organization for enabling its economic utilization, as well as the ongoing changes required in it over the life cycle of the organization in consonance with changing environments. The aim is to instill sharper understanding about the economics of trade-off in outlaying an optimized capacity toward delivering competitive products and services nationally and worldwide in right quality, right quantity, at right time.

Syllabus:

Module I: Dimensions of capacity

Operational perspectives on capacity; Goods production and service creation capacity; Designed capacity and capacity utilization; Effective transformation capacity; Capacity efficiency; Collaborative capacity; Tactical and strategic dimensions

Module II Economics of Capacity

Rough cut & composite capacity requirement planning; Capacity forecasting on demand assessment; Capacity creation on Short-, Immediate-, and Long-Term capacity need & trade-off; Capacity creation typology; Create-hire-acquire capacity additions; Greenfield and brown field mode of capacity enhancement

Module III Optimizing Capacity

Service level-focus of capacity; Surge capacity; Manpower-, technology-, & facility-oriented capacity strategy; Capacity value vs. cost optimization; Capacity learning in goods and services; . Capacity reengineering

Module IV Capacity Management & Control

Queue management & service enhancement principles; Flow variability and demand management; Capacity maintenance; Applying Lean, 5S for capacity productivity. Capacity Re-Balancing. Capacity lifecycle management: installation through renewal

Module V Recent Trends

Flexible Manufacturing Systems. Subcontracting. Outsourcing. Technological advancement

Course Title: OPERATIONS PLANNING, SCHEDULING AND CONTROL

Course Code: POM 705

Course Objectives:

The objective is to familiarize the students with the aspects of scheduling, planning and control of operations in an organization for enabling economic utilization of resources with regard to changing market dynamics over the planning horizons. The aim is to instil sharper understanding about the economics of trade-off in outlaying an optimized capacity toward delivering competitive products and services nationally and worldwide in right quality, right quantity, at right time.

Course Contents/Syllabus:

Module I Role of operations planning, scheduling and control

Role of operations planning, scheduling and control in goods and service businesses; Systems and processes; ATO, MTO and MTS scenarios; Matching supply with demand; Pre-planning operations; Managing Marketing and Finance interface activities; Orienting manpower for essential performance measures

Module II Forecasting and aggregate planning

Forecasting and aggregate planning in goods & services; Master schedules; Make or buy; Material requirement planning; Capacity engagement planning; Facility preparedness assessment; Manufacturing resources planning; Work order generation; Handling random priorities; Managing operational variability and flexibility

Module III Job-shop, flow-shop, and service sequencing

Work-order registration; Job-shop, flow-shop, and service sequencing; Operations resource allocation; Resource loading; Facilitating off-line setup; Operations activity control; Improving P: D ratio; Order closure and material redeployment; Generating work progress and variance reports for management information

Module IV Resource Management and JIT

Ascertaining schedule performance and gaps; Coordinating outsourced and in-house production; Bottleneck resource management; Process-based & capability-based flow control; Lean MRP; Toyota system and Kanban; JIT-I and JIT-II; Managing cycle time reduction and cost reduction imperatives; Factoring operations learning

Module V Recent Trends

An introduction to TPM. An introduction to ERP. Role of ERP in changing era

Course Title: SERVICE OPERATIONS MANAGEMENT

Course Code: POM 711

Course Objectives:

The objective of the course is to understand the growing significance and impact of services on the growth and economy and the scientific ways to run the operations so as to optimize the business and brand returns.

Course Contents/Syllabus:

Module I : Understanding Service Operations

Introduction; Nature & Role of Services in Economy; Service Operations and their Management Fundamentals; Service Strategy; Positioning of Services in the Organisation Value Chain

Module II: Service Operation Infrastructure

Service Facility Design, Layout & Location, Off-shoring & Outsourcing; Technology in Services, Front-office Back-office Interface; Human Factor in Services; External Associates in Service Processes

Module III : Service Process Management

Service Encounter Design and Control; Managing Service Processes; Experience Management in Service Operations; Service Quality and Reliability Assurance; Service Process Improvement & the Associated Methodologies; Experience Innovation Paradigm; New Service Development

Module IV : Improving Service Delivery Propositions

Service Growth and Globalization; Forecasting Demand for Services; Capacity and Demand Management; Customer Expectations and the Planned Provision in Service Delivery; Legal

Aspects of Expectation-Delivery Gaps; Service Waiting Line and Customer Relationship Management; Inventory Management for Improved service Delivery

Module VI Incorporating AI and Other Latest Technologies in Service Operations

Introduction to AI and other new age technologies. AI as a service (AIaaS). Futuristic Scenario of incorporating new technologies like cloud computing, simulation, robotics etc in service operations

Text Reading & References:

Course Title: Project Management

Course Code: POM 721

Course Objectives:

1. To provide theory and practice and the roles and responsibilities of the project manager.
2. To familiarize the student on the criteria of selection and identification of a project and carry out a rational appraisal
3. To understand project planning and be familiar with project control systems.
4. Explain global project management

Course Contents/Syllabus:

Module I Context of Project Management

Concept of Projects, Project Classification, Types and Categories of Projects; Infrastructure Projects, Project management in established firms, New Product Development Projects, Product/ Process Improvement Projects, Technology Induction & Assimilation Projects, Strategic Implications of Project Management Activities; Project Goals, Functions; Phases of Projects, 7S' of Projects; Project Life Cycles.

Module II Project Selection and Appraisal

Criteria for selection: Identification of the project; Project Portfolio Management; Request for Proposal; Project appraisal: Technical, Commercial, Economic, Financial and Management appraisal; Feasibility Study: Payback Period, NPV, IRR

Module III Project Planning and Organization

Project Planning: Planning steps, Master plan; Defining Project Scope, Work Breakdown Structure, Cost Breakdown Structure, Resource Breakdown Structure; Project Activity, Project Coordination, Scheduling Charts; Schedule, Gantt Charts, PERT & CPM, Allocation of Resources & resource leveling; Crashing of Projects, Project Team, Role of the leader; Project Organization: Pure, Matrix, functional

Module IV Cost & Time Estimation, Budgeting, Risk Analysis

Cost & Time Estimating methods, Budgets and Estimates; Cost-Time Overrun Issues and Implications; Project Risk Management process and Change control Management

Module V Project Review and Control

Project Monitoring and control; Project Quality Control; Critical Chain Project Management; Project Termination and Abandonment Analysis; Project Audit & closure

Module VI Recent Trends & Software Applications

Scrum Project Management. PERT Simulation. A hands on to MS Project software. Project Management in multi-cultural context

Course Title: MERCHANDISING AND CATEGORY MANAGEMENT

Course Code: RETL605

Course Objectives:

The course highlights the finer details of the retail operation called merchandising. Apart from giving the theoretical overview of the concepts and important terms, procedures and practices, the contents emphasize the planning and control aspect along with the extended applications like retail branding decisions.

Syllabus:

Module I: Merchandise & Merchandising

Concepts & philosophy, Components of merchandising Management, The Merchandising Management process, devising merchandising plans. Forecasts, innovativeness, assortment, brands, timing and allocation.

Module II: Merchandising Planning and Forecasting

Implementing Merchandise plans. Selecting and interacting with merchandising sources. Evaluating merchandise, negotiating the purchase. Concluding the purchases, receiving and stocking the merchandise. Recording the merchandise. Re-evaluating the on a regular basis. Merchandise forecast and budgeting, Designing control units, Sales forecasting, Inventory level planning. Planning purchases, Planning profit margins.

Module III: Logistics Management

Logistics and order processing and fulfillment. Transportation and ware housing. Customer transaction and Customer service.

Module IV: Inventory management

Inventory management. Retailer's tasks. Inventory levels. Merchandise security. Reverse logistics. Inventory Analysis. Inventory valuation- the cost method and the retail method.

Module V: Category Management

Category management. Concept of Category, Category management & category captainship.

Module IV: Latest Development, Trends & Practices

Software used in Merchandising and Product Planning

Text & References:

Course Title: Sourcing and Vendor Management

Course Code: RETL703

Course Objectives:

In present times, global sourcing and vendor management is a critical and complex organizational function as it involves processes, technology, systems and management skills. Finding the right vendor and solutions for customized products, services and applications and managing lead times are challenges that purchase managers face on a daily basis. The objective of this paper is to equip students with skills relating to vendor management, strategic procurements and risk management and to develop their knowledge on contemporary trends and issues in global sourcing and vendor management.

Syllabus:

Module I: Understanding Sourcing as a Strategic Organizational Function

Evolution of purchasing, Purchasing, sourcing and vendor management as a key organizational function, Purchasing objectives, Impact of strategic purchasing on profitability, Make or Buy Decisions, Types and methods of sourcing in retail; centralized vs decentralized, single sourcing vs multiple sourcing, day-to-day vs long range sourcing

Module II: The Sourcing Process

Market analysis and supplier research, Prime sources of supplier information, Request for Proposal, Fundamental steps of the buying process, terms and condition of purchase, Buying

Documentation, Negotiation, Use of IT in sourcing, Global Tenders and EProcurement, Reverse Auctions, Expanded role of global purchasing

Module III: Vendor Selection and Management

Vendor selection process, Evaluation of existing vendors, Developing vendor performance measures, new vendor development process, working with suppliers to manage quality, JIT and TQM in sourcing, Key supplier account management, Vendor relationship development, Vendor monitoring, Promoting SME suppliers.

Module IV: Cross functional Approach to Sourcing

Overview of material management function and supply chain alignment, Role of purchasing in supporting inventory objectives, Goals of Inventory Control, Hedging vs. Forward Buying, Risk management, matching supply with customer demand, managing inward logistics, Transportation modes and warehousing.

Module V: Issues in Sourcing

Legal, socio-cultural issues in international buying, Measurement of sourcing performance, Benchmarking in Retail Purchasing. Module VI: Latest Developments, Trends & Practices 20% Dealing with international suppliers, UNO and GATT conventions Environmental issues-Green Purchasing- Industry Best Practices

Text & References:

Course Title: MALL MANAGEMENT

Course Code: RETL711

Course Objectives:

The course contents provide a detailed outline of Malls and its design and retail components. Special emphasis is given to the practical aspects. The objective of the course is to impart skills necessary for taking up positions in Mall administration.

Course Contents/Syllabus:

Module I: Concept of Mall

Definition, Types and Genesis of malls, growth of malls globally, Diffusion of the concept to India, growth of malls in India, future trends and projections, advantages of mall over other retail formats, comparison of Malls in USA and India.

Module II: Mall Architecture

A description of the various components of mall architecture and their significance like Facade, Atrium, Parking, circulation path and utilities.

Module III: Handling a Mall project

Choosing the macro and micro locations, identifying the catchments, Deciding Tenant-mix and anchor tenant(s), concept planning and retail zoning, a comment on suitability of popular retail formats as anchor tenants like Hyper markets, Department Stores, Multiplexes and Eating joints.

Module IV: Components of Mall Management

Concept and Tenant-Mix Planning, Lease Management, Marketing and Space Selling, Facilities & Utilities management, Security & Information Systems, Mall promotion & Events management.

Module V: Latest Developments, Trends and Practices

Innovations at Mall in India, Use of Technology in Mall Management

Course Title: CREATIVITY & INNOVATION IN BUSINESS & ENTREPRENEURSHIP

Course Code: ENTR714

Course Objectives:

This course is designed to introduce the student to the practices necessary to stimulate and manage innovation in a business. Students will be given frameworks and methods for designing, developing, and implementing innovation in real work situations. The aim of the course is to provide the perspective and skill base necessary to manage innovation-focused projects, people, and ventures. This course will help in developing creative problem-solving skills to identify emerging opportunities and challenging conventional wisdoms. The creative and innovative

solutions that come from interactive learning experiences are examined for their ability to be successfully exploited as innovations, in the competitive market.

Syllabus

Module I Introduction to Innovation

Defining innovation and its relevance. Need and importance of innovation, types of innovation, innovation v/s invention. Lateral & horizontal technique of innovation. Need for Creativity and Innovation in start-ups and existing organizations. Drivers to Innovation; Barriers and Challenges to Innovation. Game changer

Module II Idea Generations

Creativity & Innovation. Nature of Creativity: Person, Process, Product and Environment. Generation of ideas, Capturing & Processing of thoughts. Methods for generating and evaluating creative ideas including brainstorming, mapping, metaphors, networking, intuition, judgment and imaging

Module III Idea Conversion

Evaluating ideas, conversion and implementation of ideas. Business Dimension of Innovation and nature of Innovation. Making the Idea a reality, Connecting the dots, Lasting & differentiating leadership, motivation & success

Module IV Models of Innovation

Static and dynamic models of Innovation, Incremental versus Radical innovation. Abernatty-Clark Model, Henderson Clark Model. Disruptive Technological Changes

Module V Managing Creativity and Innovation

Assessing Personal Creativity and Ability to Innovate. Enhancing Creative and Innovative Abilities. Entrepreneurial Tools for Creativity and Innovation—Exploring the Intersection, Developing and Contributing to a Creative-Innovation Team. Evolving a Culture of Creativity and Innovation in Organizations

Course Title: ENTERPRISE GROWTH AND SUCCESSION

Course Code: ENTR705

Course Objectives:

The course focuses on turning a small business into a successful and professionally managed organization along with managing the succession process. This course will focus on the challenges of building, managing and enduring a successful organization or renewing the vitality of an existing organization. The focus of this course is to learn how to use theories of

entrepreneurship, strategy, family business, innovation and management to understand ways to grow an existing business. It also strives to make the students understand what management tools, strategies and methods “will” and “will not” be effective in the growth objectives. Conclusively, the course will help in analysing the issues concerning growth strategies and succession planning.

Course Contents/Syllabus:

Module I Introduction

1. Scope, focus, and requirements of managing a small emerging enterprise
2. Motivation and desire to expand
3. Identifying and building on opportunities to grow the business

Module II Setting Direction for Growth

1. Changing goals, roles and responsibilities and setting the direction
2. Desire for growth and ability to manage the growth.
3. Choosing Growth Strategies, Expansion, Diversification, Merger, Acquisition and Franchising.
4. Entrepreneurs and managers: concept of organizational life cycles; family business issues.

Module III Valuation of Business

1. Placing a value on a business and why it matters in entrepreneurship
2. Approaches to valuation: quantitative and qualitative issues, structuring the deal
3. Negotiable terms and negotiating issues, purchasing a business.

Module IV Harvesting the Business

1. Choosing your exit strategies. Successful exit routes.
2. Harvesting firm’s value
3. Process and results, Succession planning for business

Course Title : Marketing of Services

Course Code : MKTG722

Course Objectives

This course is designed to strengthen and develop the students' ability to analyse and understand, evaluate and manage services in the international market.

Syllabus:

Module I: International Services Marketing - An Overview

Importance of Services Sector in various countries globally

Cultural fit and the service seller-buyer dyad

Internationalization of Services Sector

The limits of ICT and internet in international services marketing

Impact of Technology on service marketing

Drivers of Technology enabled service marketing

Effect of Service Marketing on Customer Loyalty

Module II: Service Quality Management at Cross Cultural Level

Global differences: Consumer Search, Consumer Choice, Experience and post experience evaluation

Managing Customer Perceptions and Expectations cross-culturally

Models of Service Quality

International Customer Service Systems

Strategic Issues in Managing Service Quality

Gap Model, Service Encounters

Competitor Intelligence, Service Recovery

Module III: Market Strategies for Service Organizations

Creating Value in market-oriented service organization

Strategic Pathway

Competitive advantage and competitive position

Generic Strategies to go to market

Service Profit Chain

Module IV: Services Development and Design

Global challenges of service innovation and design

New service development process

Types of Service Innovations

Stages in service innovation and development- cross-cultural considerations

Service Blueprinting

Service standardization Vs adaptation

Pricing services across borders

Module V: Managing the International Servicescape

Physical evidence

Strategic role of service escape

Servicescape effects on cross cultural consumer behaviour

International service escape strategy

Module VI: Delivering and Performing Service

Strategies for delivering Service quality through people globally

E-services-Emergence & growing importance of e-services

Electronic Channels of Delivering Services

Challenges in distributing services through electronic channels

Future of delivering services: Impact of Artificial Intelligence, Big Data etc.

Course Title: MANAGING INNOVATION PROCESS

Course Code: ENTR715

Course Objectives:

A well-executed innovation plan is the basic ingredient to succeed in a highly competitive market. The students who opt for the course will develop an innovative concept and present an execution plan at the end of the semester. The course intends to give a platform to the students to establish themselves as entrepreneurs or intrapreneurs using product, process or service innovation. This course will help the students appreciate the role and need for innovation in an organization. It would also help the student create an ability to be a 'change agent' for the organization he/ she works for. The course is designed to help the student use theoretical frameworks to interpret case studies and implement the learnings in real-life scenarios.

Course Contents/Syllabus:

Module I Exploring innovations

1. Creativity and Innovation 2. Difference between Invention and Innovation; Idea generation process 3. Disruptive Innovations 4. Components of Innovation 5. Types of Innovations (Product, Process and Services) 6. Levels of innovation : National Level, Enterprise level and Individual level 7. Linear and flexible innovation process; Open innovation; innovation networks 8. Moving Innovations to market: Idea broking; Understanding the need of the consumers

Module II Executing innovations

1. Customer centered innovation map 2. Discovery-driven planning 3. Steps to execute innovation 4. Matching execution to company strategy 5. Finding and recognizing talent 6. Building core teams across departments to execute proposed innovation 7. Structuring the incentives to effectively allow individuals to execute innovation process 8. Measuring performance

Module III Exploiting innovations

1. Reverse Innovation 2. Building scenarios on impact of innovation 3. Value of innovation: Consumers perspective, Competitors' perspective 4. Building product portfolios and portfolio management 5. Strategies to be considered to exploit the true value of innovation

Module IV Renewing innovations

1. Cultivating innovation 2. Processes, structures and strategies of renewing innovations 3. Analyzing competition and disruptive innovations 4. Exploring, executing and exploiting innovations that established firms can use to renew their innovation foundations

Module V Working with the innovation

The Student will work on his/ her dream innovation under the guidance of a Mentor, either from the industry or a senior academician. The student is expected to consider all of the following aspects: 1. The innovation/ innovative idea 2. Practicality of Innovation/ Innovative idea 3. Substitute analysis and success factors 4. Testing the innovation 5. Innovative launch plan

Course Title: CORPORATE ENTREPRENEURSHIP

Course Code: ENTR723

Course Objectives:

Corporate entrepreneurship is the practice of employing entrepreneurial skills and approaches within an organization. To achieve and sustain a true competitive advantage in today's rapidly changing global business environment, companies must be faster, creative, flexible and innovative. Resource availability may be limited or non-existent to support innovations and initiatives. In other words, organizations must be more innovative and entrepreneurial. This course focuses on the processes, by which teams within an established company conceive, foster, launch, and manage existing and new business that is distinct from the parent company. The ability to simultaneously integrate (see what is similar) and differentiate (see what is different) between a company's existing and new business is crucial to the success of any corporate entrepreneurship effort. The course emphasis will be placed on the skills needed to promote and manage corporate entrepreneurship including opportunity recognition, orientation and transition management. The main focus is to build "Intrapreneurial" mindset in managers to think differently beyond the traditional managerial concept.

Course Contents/Syllabus:

Module I Concept of Corporate Entrepreneurship

1. The changing nature of the strategic challenge confronting organizations, the nature of entrepreneurship; the entrepreneurial process
2. Meaning of Corporate Entrepreneurship or Intrapreneurship
3. Distinction between entrepreneurship & Intrapreneurship, need & importance,

Module II Need for Corporate Entrepreneurship

1. The organizational life cycle
2. Why stay and why leave, why do corporate entrepreneurship
3. Getting started, a framework for understanding the obstacles to corporate entrepreneurship.

Module III Developing Corporate Entrepreneurship

1. Building an organizational environment conducive to entrepreneurial endeavors, embracing new business models, corporate incubators
2. Function and organization of new venture units, new approaches: incorporating creativity into the corporate process.

Module IV Types of Intrapreneurship

1. Life cycle of Intrapreneur
2. Classification of Intrapreneur
3. Changing rate of traditional managers

Module V Stages of Corporate Entrepreneurs

1. Stages of Intrapreneurial team development- solo phase, network phase, bootleg phase, format team phase
2. Changing environment for corporate Intrapreneurs, implications & future for

Intrapreneur 3. Corporate entrepreneurship in developing economies, corporate entrepreneurship in the social sector.

Course Title: Training and Development

Course Code: HR715

Course Objectives:

Organizations today function in a dynamic and complex environment. Faced with increased competition, expanded regulations, sophisticated technology, and limited resources, organizations must respond to extraordinary demands for quality, productivity, and cost efficiency. Organizations must implement processes to continuously train and develop their most important resource – their people. Through the learning experiences provided in the Training and Development, students master the concepts, knowledge, and skills necessary to manage a training and development function within an organization.

Course Contents/Syllabus:

Module I : Introduction to Training and Development

- Overview and Trends in training
- Important concepts and meaning of training
- Difference between Training and Development
- Aligning Training with strategy
- Strategic Training and Development Process

Module II: Need Assessment

- Why is Needs Assessment necessary?
- Who should participate in Needs Assessment?
- Methods used in Needs Assessment
- The Needs Assessment Process
- The TNA model Need assessment methods and techniques

Module III: Design and Development

- Principles of Training Design
- Design Process
- Models of Training Design

Module IV: Training Methods

- Introduction
- Presentation Methods: Lecture, Audio visual techniques
- Hands- on Methods; On- the job training, simulations, case studies, Business games, Role plays, Behavior Modeling
- Group Building Methods: Adventure Learning, team training, action learning
- Choosing a training Method
- E- Learning and use of Technology in Training

Module V: Evaluation of training

- Meaning
- Models of Training Evaluation
- Data Collection for Training Evaluation
- Designs for training Evaluation

Course Title: ENTERPRISE MANAGEMENT

Course Code: CSIT723

Course Objectives:

Today Enterprise comprises of various stakeholders, such as employer, partners, customers and managing them is the key factor. This course is designed to provide a comprehensive insight into theoretical foundations, concepts, tools and current practice of enterprise systems. This course exposes students to core business processes and how these processes are implemented with enterprise resource planning (ERP) systems in organizational settings.

Course Contents/Syllabus:

Module I Decision Support and Business Intelligence

Managerial Decision Making and Information Systems, Decision Support Developments, Executive Information Systems, Data Warehousing, Access, Analysis, Mining and Visualization, Group Decision Support Systems, Intelligent Decision Support Systems, Knowledge-based Decision Support Systems, Knowledge Acquisition and Validation, Knowledge Representation, Knowledge Management

Module II Overview of ERP Systems and Business Processes

e-Business Backbone, Introduction to ERP, Mapping business processes in an organization and case for process improvement (BPR), Managerial issues in implementing ERP systems for organization- Risks and Benefits, Implementation Drivers: Critical Success Factors, Implementation Models, Selection Process, “ERP gone bad” Lessons from real-world failures. ERP and Related Technologies, Extending ERP systems to suppliers and customers. (SRM, CRM, SCM), Emerging Trends in Enterprise Systems,

Module III e-CRM

Commerce in the 21st century, e-Business Models, Enterprise 2.0, Social CRM and CMR – social networks, wikis, blogs, e-Marketing, e-CRM, e-Business Security/Payment Services, Sales 2.0, Sales Intelligence, Analytics.

Module IV Enterprise Systems and Supply Chain Management

Collaborative Value chain, Overview of Enterprise Systems and Supply Chain Business Processes, The sales order-to-cash process and purchase-to payment, The Procurement Process and SRM Systems, eSCM, e-Procurement, Integrated Processes and Supply Chain, VRM, Logistics Activity Profiling and Mining, Logistics Information Systems, Web Based Logistics, OLTP

Course Title: INFORMATION SECURITY & RISK MANAGEMENT

Course Code: CSIT726

Course Objectives:

This course focuses on the fundamentals of information security that are used in protecting both the information present in computer storage as well as information traveling over computer networks. Interest in information security has been spurred by the pervasive use of computer-based applications such as information systems, databases, and the Internet. Information security has also emerged as a national goal in the United States and in other countries with national defense and homeland security implications. Information security is enabled through securing data, computers, and networks. In this course, we will look into such topics as fundamentals of information security, computer security technology and principles, access control mechanisms, cryptography algorithms, software security, physical security, and security management and risk assessment. By the end of this course, you will be able to describe major information security issues and trends, and advise an individual seeking to protect his or her data.

Course Contents / Syllabus:

Module I: Introduction of Information Security

Goals of Computer Security . CIA triangle, Identifying the Assets, Threats, Impact, vulnerabilities, User Authentication, System Access Control, Password Management, Privileged User Management, User Account Management , Data Resource Protection , Sensitive System Protection, Cryptography, Intrusion detection , Computer-Security Classifications

Module II: Computer Security

Hardening (Operating System and Application Code, File System Security, Local Security Policies, Services, Default Accounts), Network Activity, Malicious Code, Firewall , Fault Tolerant System , BACKUP and UPS

Module III: Network Security

Network security issues, threats & solutions, cryptography, algorithms (encryption, substitution, sequential and random, transposition), crypto-analysis, methods of breaking these algorithms.

Module IV: Disaster Management

Types of Disaster, Challenge in Global operations, Understanding disaster recovery & business continuity, Business Continuity Management, Preparing BCP – a 10 step process, case (eg WTC)

Module V: Management of Security taking Windows OS as example (Practical)

Security Management , Users and Groups Management , Managing Local and Global Groups, Managing User Accounts , Windows NT Domain Management,, Registry Management , Logical Structure , Physical Structure , DNS Management , Managing Group Policy, User

Authentication Management, Creating Domain User Accounts, Files and Folder Management, Files and Folder Permission Shared Resources Management, Encrypting File System (EFS)

Course Title: BUSINESS PROCESS MANAGEMENT

Course Code: CSIT715

Course Objectives:

The course addresses the methods and techniques required to analyze, design, implement, automate, and evaluate business processes. Structured along the phases of the Business Process Management (BPM) life cycle, students learn to analyze organizational performance from a process perspective, redesign processes using value-focused techniques, design workflows and implement them in BPM systems. Upon completion of this course participants will be able to assess the efficiency and effectiveness of an organization from a process perspective, conduct process improvement projects, and determine the role of technology in supporting corporate processes.

Course Contents / Syllabus:

Module I: Business Process Optimization

Understanding Business Process, Cross functional business process, .Business process optimization, Work flow automation, and value chain. BPM road blocks

Module II Business Process Management Life Cycle

Implementation of Business Process Life Cycle. Business Modeling, Process Design, and Optimization. BPM best practices

Module III Module III: Introduction to Data Modeling Techniques

Methodology, tools and techniques. Systems Modeling, Logical and Physical Models, Data Modeling, Types of Data Modelling, Entity relationship Diagram, Entity, Types of Entities, Attributes, Types of Attributes, Domain

Module IV: Introduction to Modern Structured Analysis

Methodology, tools and techniques, process and concepts - Decomposition, Decomposition Diagram, Logical Process and conventions, Structured English, Decision Table, Event Decompositions Diagram, Developing DFD, information engineering, Prototyping, Rapid Application Development model driven development. BPM trends

Module V: Introduction to Object Oriented Analysis & Modeling

Reading and interpreting an object model, describing object modeling in the context of systems analysis with the help of class diagram, state diagram and event diagram.

Course Title: Managing Business in Emerging Markets

Course Code: IB711

Course Objectives:

The course offers a comprehensive look at emerging markets, especially (but not only) the BRIC countries (Brazil, Russia, India, China), as they integrate with the global economy. We offer a conceptual framework to analyze emerging markets from multiple perspectives: that of indigenous entrepreneurs struggling to overcome constraints to build world-class businesses, that of multinationals from developed countries tapping into emerging markets for their next growth spurt, and that of domestic and foreign investors seeking to profit from investment opportunities in emerging markets.

Course Contents/Syllabus:

Module I Introduction

Overview of emerging markets, Political, legal and cultural framework in emerging markets, Ethical issues, Trade and foreign Investment, Demographic characteristics, Market characteristics, Factors effecting international business,

Module II The Economic Environment

Differences in economic environment in emerging markets, Institutional voids, framework and developing institutions, Infrastructure & infrastructural gap, Income distribution, Business Groups,

Module III Opportunities and Trend in Emerging Markets

The growth of middle income and rise in consumption level, Growth of mid-sized cities, rural development, Services, technology and telecommunication, inequalities, taking advantage and adopting business models, Business at the bottom of pyramid.

Module IV Strategies for the Entry

An overview for the entry in emerging market, Trade based entry strategies, export, Bidding for global tenders, global sourcing and outsourcing, contract based entry strategy, licensing, franchising, technology transfer projects, management contracts, Investment entry modes-marketing subsidiaries, joint ventures, wholly owned entry strategy, Factors influencing entry strategy

Module V An Analysis of Selected Emerging Markets

BRIC Economies- Brazil, Russia, India, China New frontier economies in Latin America- Mexico, Chile, Peru Emerging economies of CIS countries Emerging economies of Africa Other emerging Economies in Eastern Europe

Course Title: Global Outsourcing

Course Code: IB 634

Course Objectives:

Outsourcing goods and services on a global basis has become a central part of most companies' growth strategy. The course aims to familiarize students with key issues related to global outsourcing strategy as a management practice that is today widely used and growing in popularity. Secondly, a key development objective is to build the skills of exploring , learning, analyzing, relationship management and new management practices in outsourcing. Through this course the students will appraise themselves with an understanding of the impact that outsourcing and supply management have on the success and profitability of firms in today's business environment.

Syllabus:

MODULE-1(INTRODUCTION)

Introduction, Definition, need and relevance of Global Sourcing, Evolution of sourcing. Purchasing a dynamic profession, origins of purchasing and transition to supply chain management. Five major developments- cross functional teams, supply chain and supply networks. supply alliances ,strategic sourcing, e-procurement, global sourcing

MODULE-II(Corporate strategy and outsourcing)

How Corporate Strategy Drives Outsourcing Strategy. Roles and Responsibilities in strategy development and execution. Models- Off shoring Business Arrangements

MODULE-3(Types of Outsourcing)

Types of Global Sourcing: Global sourcing of HR. Accounting or Finance. Global sourcing of Procurement/Supply Chain. Global sourcing Governance: PMO, contracts, Emerging Trends

MODULE-4(Sourcing and Proposals)

Sourcing Activities: Sole Source v. Competitive Selection. Candidate Pool, "Qualified Sources. The Request for Proposal, Bid Evaluation,. Landed Cost", "Best Value" Selection

MODULE-5(Contract and Negotiation)

Contract Formation, Contract Negotiation: Negotiation Objectives, Negotiation Strategy, Negotiation Best Practices, Relationship Management

MODULE-6(International Sourcing Decision)

International Sourcing Decisions: Manufacturing/National brands, Private label brands, Premium branding. International sourcing. Costs associated with global sourcing decisions, Foreign currency fluctuations. Tariffs, Free trade zones and Retailing. Managerial issues associated with Global sourcing decisions, International vendor management

Course Title: Foreign Trade Policy

Course Code: IB722

Course Objectives:

India is now aggressively pushing for a more liberal global trade regime, especially in services and has assumed a leadership role among developing nations in global trade negotiations. Our Foreign Trade Policy now has the dual objective not only to encourage exports but also to facilitate those imports into India which are required to stimulate our economy. Regional, bilateral and multilateral trade agreements also play an important role in world trade. An understanding of the Policy, export promotion/incentives available for exports and tariffs imposed on imports is imperative to run an Export/Import business.

Course Contents/Syllabus:

Module I: World Trade & Economic Integration

Why Trade, Link between Trade & Economic growth, Complexities & Barriers to free trade, World's leading economies, World's Top Trading Nations & Emerging markets, Free Trade Areas, Customs Union, Common Markets, Economic Unions, Regional Economic Blocks- EU, NAFTA, MERCOSUR, SAARC, SAFTA, APEC, ASEAN, ECOWAS, GCC, OPEC.

Module II: World Trade & Standardization Organizations

WTO, IMF, World Bank, WCO Harmonized Commodity Description & Coding System, ISO Currency codes - ICC

Module III: Overview of India's Foreign Trade Policy & Major Trading Partners

The Foreign Trade (Development & Regulation) Act, Objectives of India's Trade Policy 2014-19, Post 1991 India's Trade Liberalization, India's Economic Indicators, Export/Import data & Major Trading partner countries, How to start an Export/Import business - Import Export Code (IEC), Registration cum Membership Certificate (RCMC) with appropriate Export Promotion Authority, Role & Types of Export Promotion Councils, Export Documents - Commercial, Financial, Transport, Title, Govt., Insurance, Export Assistance Documents & Certificates used in Exports, Import Documents - Licenses & Customs documents for imports.

Module IV: India's Export - Policy, Documentation & Procedures

Fiscal, Financial, Special Schemes & General incentives provided to exporters, Promotion Schemes like Status holders Certificate, FMS, FPS, MLFPS, VKGUY, SFIS, Deemed Exports, Duty Exemption Scheme & Duty Refund Schemes - Export Promotion Capital Goods Scheme, Advance Authorization, Duty Drawback, DEPB scheme, Free Trade Zones & Special Economic Zones - Export-oriented Units, Software Technology Parks., AEZ's etc

Module V: India's Import – Policy, Documentation & Procedures

Types of Imports, Basic Import Process, Restrictions on Imports, Basics of Indirect Taxes, Tariff structure and Customs Duties including Anti-Dumping duty, Safeguard duty etc, Calculation of import duty for various category of goods – Raw Material, Capital & Project imports, Concessions and benefits available for certain importers like samples, goods for Exhibitions, Tourists & NRI's

Course Title: OPERATIONS STRATEGY

Course Code: POM724

Course Objectives:

The objective is to develop understanding about the practical aspects of operations strategy, selection of process and infrastructure development. The aim of this course is to make the students familiar with the changes required in the operational strategy with changing environment.

Course Contents/Syllabus:

Module I: Concept and Framework of Operations Strategy

Role and Objectives of Operations Strategy; Operations Strategy Framework: Incorporating Operations Strategy in the Corporate Strategy; Operations performance essentials; Competition, Competencies & Operations; Defining a Operations Strategy in Overall Environment; Process of Operations Strategy Formulation

Module II: Resource View of Operations Strategy

Principles and Concepts of Developing Operations Strategy; Methodology of Developing Operations Strategy; Capacity Strategy: Capacity Types, Flexibility & Consolidation, Capacity Timing & Expansion, Capacity Sizing & Investment; Facility Strategy & Globalization: Infrastructure Development; Supply Network Strategy: Capacity Location, Global Network & Off-shoring, Strategic Sourcing, Coordinating the Supply Chain

Module III: Process View of Operations Strategy

Process Technology Strategy: Effect of Technology Advancement and Technology Management, Integration of Operations Strategy Planning and Technology Planning, Production Implications of Corporate Marketing Decisions; Strategy Development and Practices; Improvement & Innovation; New Product & New Service Development; Product Variety Impact in Operations Strategy; Operations Strategy Process – Sustainable Alignment

Module IV: Competency View of Operations Strategy

Implementation of Operations Strategy; Business Implication of Process Choice: Dynamics of process-product life cycles, Product Profiling, Improving Operations Process by Process Positioning; Cross-Cutting Capability; Operations Strategy Process – Implementation; Prerequisites of Organized and Focused Operations Strategy & Unit; Principles and Concepts of Factory-within-Factory; Involvement of Human Aspects

Module V: Redefining Operations Strategy

Operations Redefining & Restructuring; Demand and Revenue Management; Operations Strategy Process – Substitutes: BPR, TQM, Lean, Six Sigma: Business Process Focused Strategies & Organization Development: Quality Planning and Controlling System, Improving Response Time with IT, Operations Audit Approach; Risk Management & Hedging: Accounting & Financial Perspectives and Operations System, Business Continuity Planning, Disaster Recovery strategy

Course Title: MANUFACTURING AND SERVICES COMPETITIVENESS

Course Code: POM725

Course Objectives:

The objective is to familiarize the students with manufacturing and services competitiveness, practices and importance as well as the changes required in the operational technologies with rapidly evolving environments. The aim is to instill sharper understanding about the practical current aspects of creating and delivering competitive products and services nationally and worldwide.

Course Contents/Syllabus:

Module I: Competitiveness Profiling in Manufacturing & Services

1. Product positioning and competitiveness strategy; 2. Taking execution to increase output, reduce cost, and generate more cash; 3. Competitiveness in manufacturing; 4. Evolution of World Class Manufacturing; Early models of Hall, Gunn, Maskel & Schonberger; Later frameworks and current approaches; Core competence model; 5. Service competitiveness; 6. Service strategy; 7. World Bank, OECD, and HSBC PMI indicators; 8. RBI BOP trends

Module II: Benchmarking Industry Competitiveness

9. Performance measurement; Measure to motivate; Traditional and non-financial measures; 10. Competitive intelligence; 11. Activity based costing; Transaction costs; 12. Process analysis and service blueprinting; 13. Comparing with efficiency frontier; 14. Competitor analysis; 15. Tracking outcomes for product experience enhancement

Module III: Attaining Competitiveness

Aligning strategy, structure, and processes for PESTEL factors; 17. Tracking and improving P: D ratio; 18. Master schedules for 3-R; Design Yield management; 19. Quantity, quality, and service learning; 20. Focused inventory management and service supply chain excellence; 21. Cycle time reduction; 22. Customer analysis and segmented initiatives to deliver faster, better, more and cheaper

Module IV: Emerging Trends & Challenges

23. WTO and GATS; 24. Role of subsidies in competitiveness; 25. Agreement on countervailing measures; 26. National Manufacturing Competitiveness Council, 27. National Manufacturing Plan and National Services Competitiveness Council agenda; 28. Technology

and knowledge driven competitiveness; 29. Cultural sensitization and skill development for sustainable competitiveness

Course Title: LEAN SIGMA

Course Code: POM731

Course Objectives:

The objective of this course is to make the students understand the importance of a measurement based strategy, which focuses on process and sub-processes improvement through the application of Principles and methods of Lean Six Sigma.

Course Contents/Syllabus:

Module I: Overview of Six Sigma and Organizational Goals

1. The history and methodology, philosophy and goals,
2. Key drivers for business, project selection process, introduction to DMAIC, DFSS, seven basic quality tools.
3. Lean Principles: value chain, flow, pull, perfection, tools commonly used to eliminate waste, kaizen, 5S, error proofing, value-stream mapping. value-added and non-value added activities, excess inventory, space, test inspection, rework, transportation, storage, cycle time,
4. Theory of constraints.

Module II: Define Phase

5. Process components and boundaries, process owners, internal and external customers, other stakeholders, translating customer feedback into project goals,
6. Pareto chart,
7. CTQ attributes, VOC,
8. QFD, affinity diagrams, interrelationship digraphs, tree diagrams, prioritization matrices, matrix diagrams,
9. PDPC charts, activity network diagrams, business results for projects, process performance metrics,
10. DPU, RTY, COPQ,DPMO sigma levels and process capability indices, FMEA, RPN,
11. Six Sigma teams, Black Belt, Master Black Belt, Green Belt, Champion, executive, coach, facilitator, team member, sponsor.

Module III : Measure Phase

12. Process maps, written procedures, work instructions, flowcharts, SIPOC, relational matrices, techniques for assuring data accuracy and integrity,
13. GR&R, measurement correlation, bias, linearity, percent agreement, and P/T,
14. Natural process limits and specification limits, percent defective, Cp and Cpk, Pp, Ppk, Cpm,

Short-term vs. long-term capability, 1.5 sigma shift, sigma level for a process and its relationship to Ppk.

Module IV: Analyze Phase

15. Exploratory Data Analysis,
16. Create and Interpret Multi-vari studies to interpret the difference between positional, cyclical, and temporal variation; sampling plans to investigate the largest sources of variation,
17. Applications of simple linear correlation and regression,

Hypothesis Testing - Tests for means, variances, and proportions, paired-comparison tests, single-factor ANOVA and Chi squared Test in Six Sigma

Module V: Improve and Control Phase

18. DOE, SPC, rational sub grouping,
19. X Bar - R, p, np and c, implement and validate solutions,
20. Measurement system capability, re-analysis, and post-improvement capability,
21. Developing a control plan to document and hold the gains, implementing controls and monitoring systems.

Course Title: Retail Branding and CRM

Course Code: RETI707

Course Objectives:

The course involves the objective of imparting comprehensive understanding of the fundamentals of building, measuring, and managing a brand. The emphasis is also on enhancing life time value of customers and developing partnering relationships with profitable loyal customers.

Course Contents/Syllabus:

Module I: Concept of branding

Concept of branding, the challenges faced by brand managers, the value of a brand to customers and the organization, Branding Challenges & Opportunities, Strategic Brand Management Process Criteria to choose brand elements, Creation of brand personality, brand personality scale, brand image sources, Brand identity dimensions

Module II: Brand Re-vitalization & Equity

Brand & Line Extensions, Marketing Mix for Brand Extensions, Co – Branding. Upward and Downward stretching of brands, Components of retail image. Dynamics of creating and maintaining retail image, The brand equity concept, Brand Equity Models – Customer Based Brand Equity, Aaker Model, Brand hierarchy Brand Awareness, Brand Loyalty, Brand Associations, Brand Recognition, Recall

Module III : Planning Retail Promotional Strategy

Elements of retail promotional mix : Advertising, public relations, personal selling, sales promotions. Point of purchase advertising, Determining promotional objectives. Establishing an overall promotional budget. Selecting the promotional mix, Implementing the promotional mix, Reviewing and revising the promotional plan.

Module IV : Creating Customer Value through CRM

Importance of CRM, Rationale and Benefits of CRM; Types of CRM; Emerging Issues and Future Trends of CRM. Customer relationships and channel relationships. Customer Satisfaction: Pre-requisite to customer Relationship; Customer Value; Value Chain Analysis; Customer Life time Value: Concept and Measurement ; Measuring Equity in Customer Relationships

Module V: Customer retention strategies

Relationship retailing, Managing Service Recovery and Complaint Handling; Customer Retention Strategy

Text & References:

Course Title: E-RETAILING

Course Code: RETL710

Course Objectives:

This course provides an overview of e-retailing from both technological and managerial perspectives. It introduces e-retailing frameworks, and technological foundations; and examines basic concepts such as strategic formulation for e-retailing enterprises, management of their capital structures and marketing an online store. This course is designed to familiarize students with current and emerging electronic retailing changes.

Syllabus:

Module I: E-retailing

Meaning, concept, significance, comparison with convention retailing, Transition from Traditional Marketing to e-Marketing, Demographics and Targeting, Adaptability and Closed – Loop Marketing, Advantages of e-Retailing, Shortcomings of e-Retailing. Brick & Mortar, Click & Mortar and pure E-retailing, Multi-channel retailing.

Module II: E-retailing models, starting an E-store

E-retailing models, Weighing the options, approaches to building an E-store, requirements of an effective E-store, E-store design: web atmospherics, navigability, interactivity, retail information

Module III: Marketing Strategies for E-stores

Marketing mix in the age of E-retailing; the roles of cyber intermediaries in E-retailing; E-retailing and supply chain management system; Promotional strategies of E-retail business, Branding on the web, offline marketing, cross selling, referral services, permission marketing.

Module VI: Payment & Security issues

Online payment processing, internet payment gateways, internet security issues, E-malls, future of e-retailing

Module V: Customer Relation Management in E-retailing

Building customer loyalty, CRM implementation, Customer service, gift reminder services, contests & promotions, online communities, loyalty programs, personalization

Module VI: Latest Developments, Trends and Practices

Inventory Based Model, Market Place Model, Vendor Development, Business Expansion and Legal Implications

Text & References:

• D.P. Sharma, E-retailing Principles and Practice, Himalaya Publications • Carroll & Broadhead, Selling Online: How to Become a Successful E-Commerce Merchant, Dearborn publishers • Janice Reynolds, The Complete E-Commerce Book: Design, Build, and Maintain a Successful Web-Based Business, CMP Media. • Dennis, Fenech & Merrilees, E-retailing, Routledge Press • Levy & Weitz, Retailing Management, Tata McGraw Hill

Course Title: Luxury Retail

Course Code: RETL713

Course Objectives:

To familiarize the students with theoretical concepts of how Luxury segment is a different ball game. The knowledge of handling niche customers will help the student in enhancing their skills in understanding and handling such shoppers. It helps students get exposure to an altogether different segment of Retail.

Course Contents/Syllabus:

Module I: Introduction to Luxury

Fundamentals of Luxury, Genesis of the Luxury segment, Difference between premium and luxury products. Importance of luxury today, Customer Handling, Introduction to Indian Luxury Brands

Module II: Luxury Services and Branding

Luxury Service Scenario in India, What service qualifies for Luxury, Developing brand equity, Brand Stretching, What makes a product part of the luxury segment?

Module III: Anti-laws of Marketing

The laws that defy Marketing Management rules.

Module IV: Pricing and Distribution

Determining price premium, Price fixation, Price reduction/markdowns and Sales. Distribution and then Internet distribution. Luxury Malls in India

Module V: Strategic Perspectives

Luxury business models, Entry & Exit from Luxury, Classic Marketing.

Module VI: Latest Developments, Trends and Practices

Taking Indian Brands Abroad, Making India a Luxury Destination

Text & References:

Course Title: RURAL PROJECT PLANNING AND MANAGEMENT

Course Code: RUR 604

Course Objectives:

Main objective of the course is to help students to learn about: Basic concepts of project cycle and project planning cycle. Developing project ideas using appropriate methodology. Designing a project using Logical Framework Analysis (LFA) and implementing a project at grassroots level

Course Contents / Syllabus:

Module I Project Cycle

Generation of project idea, Preliminary Design, Concept of project and project cycle, concept of Project Planning, Macro & Micro Planning, , Feasibility Study (Social, Economic, Technical, Managerial & Environmental feasibility), Implementation, Evaluation, Result Based Management

Module II Logical Framework Analysis

(LFA) – Concept of LFA, Stakeholder Analysis, Problem Tree and Objectives Tree analysis, Analysis of strategies, Fixing project output and activity, Assumptions and Risks Monitoring and Evaluation indicators

Module III Project Design & Implementation

Core Components : Objectives, Outputs, Activities and Inputs, Project Implementation concept, Pre-requisites for Project implementation, Process of project implementation planning, Factors Affecting Implementation, Designing Networking techniques for project implementation, Project review and control, Feedback Mechanism, PERT and CPM model

Module IV Monitoring & Evaluation

Introduction, Planning & Designing a Monitoring plan, Key National & International Monitoring Systems, Evaluation Framework and different models, Steps of Evaluating a Project, Types of Evaluation

Module IV Latest Developments

Community Resource Mapping, Sustainability Strategy, Budget and Work Plan, Impact Assessment and Social Audits, Association with NGOs and Local Bodies

Course Title: RURAL ENTREPRENEURSHIP AND DEVELOPMENT

Course Code: RUR611

Course Objectives:

This course intends to provide exposure and good understanding to the students on Rural Enterprises and its various aspects. This course educates the students about scientific methodology for learning different enterprises and design modules for rural enterprises. It also helps to develop entrepreneurial qualities among students.

Course Contents / Syllabus:

Module I: Introduction

Rural Entrepreneurs & Rural Artisans, Group & Cooperative based enterprises, Factors influencing Entrepreneurship, Problems and Challenges in Rural Enterprise management

Module II: Institutional Support & Capacity Building

Entrepreneurship Development: Introduction & Strategy, Steps to Develop Rural Entrepreneurship, National Small Industries Corporation (NSIC) : Salient Features, KVIC and its interventions,

Module III: Major Stakeholders

NABARD & its schemes, MSME Ministry, Small Industries Development Bank of India (SIDBI), District Industry Center: Functions & Roles, Incentives & Facilities,

Module IV: Supporting Schemes & Funding Sources

Project Formulation & Implementation, Prime Minister Employment Generation Program (PMEGP), Startup India, Mudra Scheme, State Finance Corporation (SFC). Funding Source: Angel Investors and Venture Capitalists,

Module V: Rural Enterprises and Technology

Use of Technology in Rural enterprise, CAPART and its Interventions, Successful Rural Interventions based on Technology, Rural Innovations : Current Status and Impact on beneficiaries
